GSPD SACNAS

workshop:

how to make a personal website

Using GitHub

Why make a personal website?

Why make a personal website?

https://app.sli.do/event/prEEi7pzW3gVDYTwLQJTH9

Why make a personal website?

- Showcase your work!
  - Interested in science communication? → Write blogs
  - Interested in ‘data science’/CS → Add your projects/repos/libraries/apps
  - Science art portfolio
  - Leadership/Outreach portfolio
  - Publication portfolio! (Bonus if you add your research interests and make it cohesive)
- Networking opportunities
  - CV
  - Contact info
- Add anything that doesn’t fit on your CV that makes you stand out
  - Maybe personal branding?
  - Hobbies? Side hustle?

Making a website using GitHub

Why use GitHub?

- Free hosting using github pages
- Open source, open access
- Free templates, lower barrier to entry
- Can customize more compared to other platforms using Markdown, HTML and CSS frameworks

SACNAS CHAPTER
GSPD at UCD

How to make a website using GitHub Workshop

https://pages.github.com/

SACNAS CHAPTER
GSPD at UCD

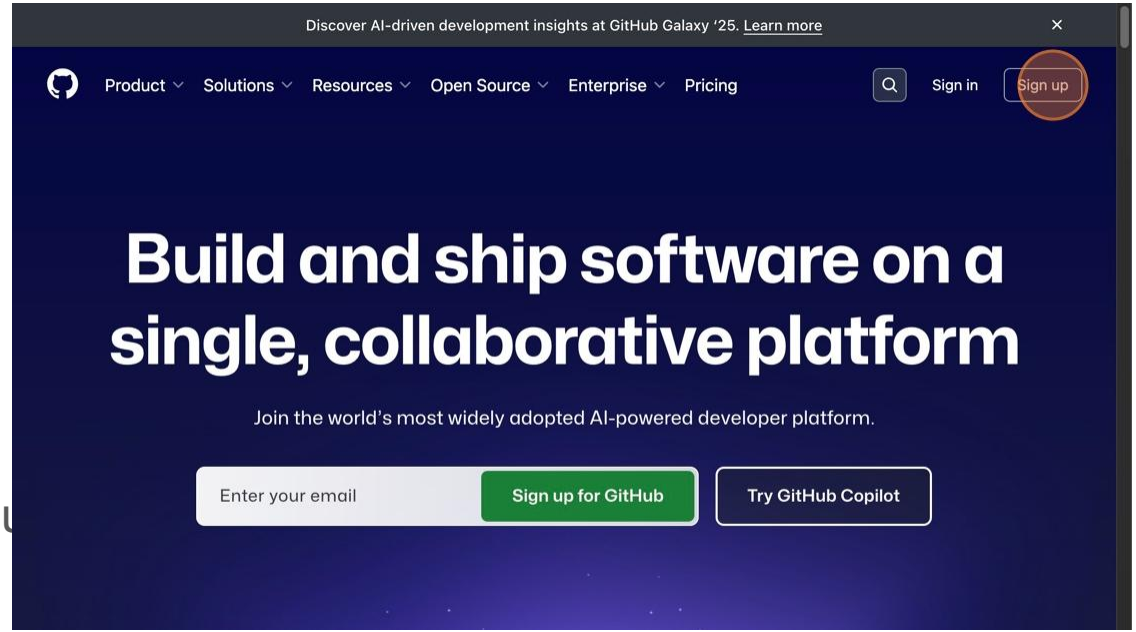

Step 0: I am not an expert!

While I’m still learning, I’m happy to share what I have learned so far. Hopefully we can all learn together and create a website that showcases our hard work!

Step 1: Sign up / log in

Navigate to https://github.com

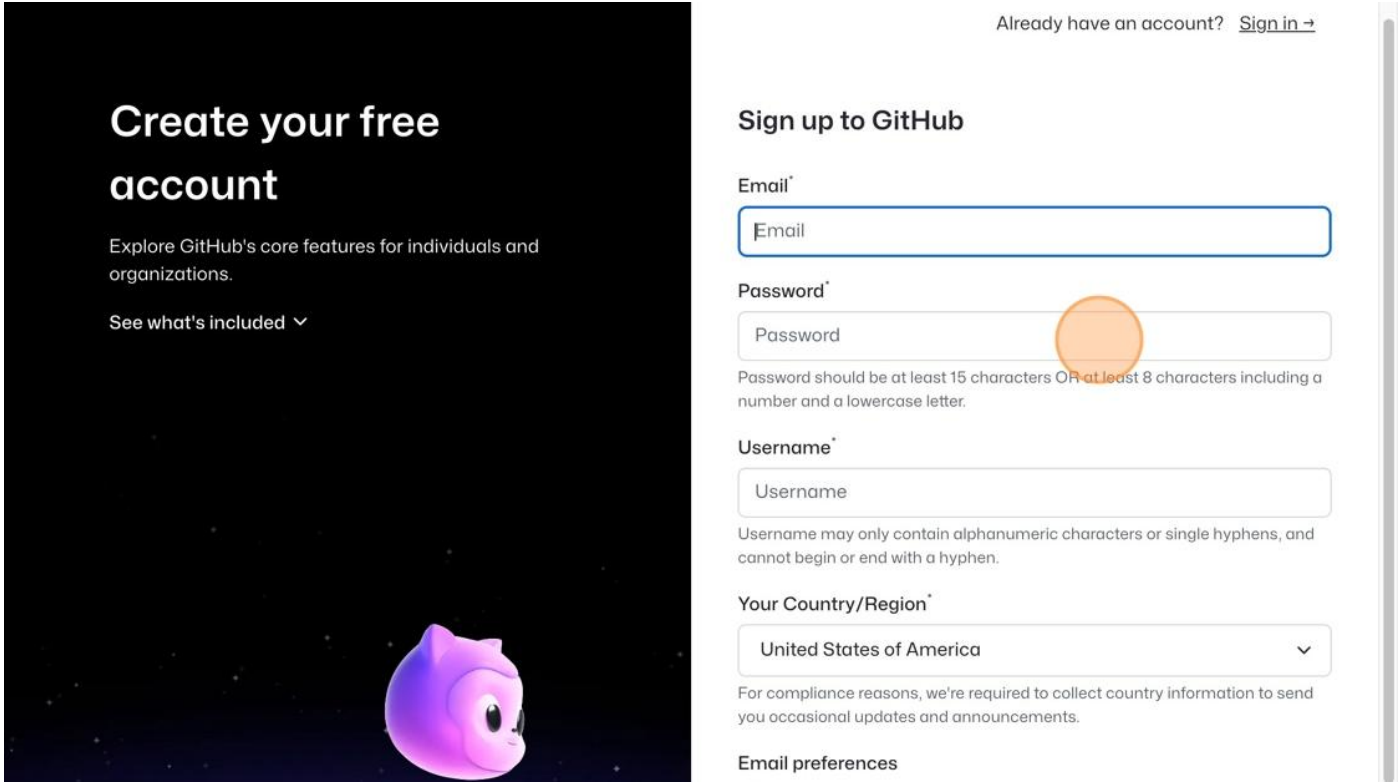

Sign up / log in

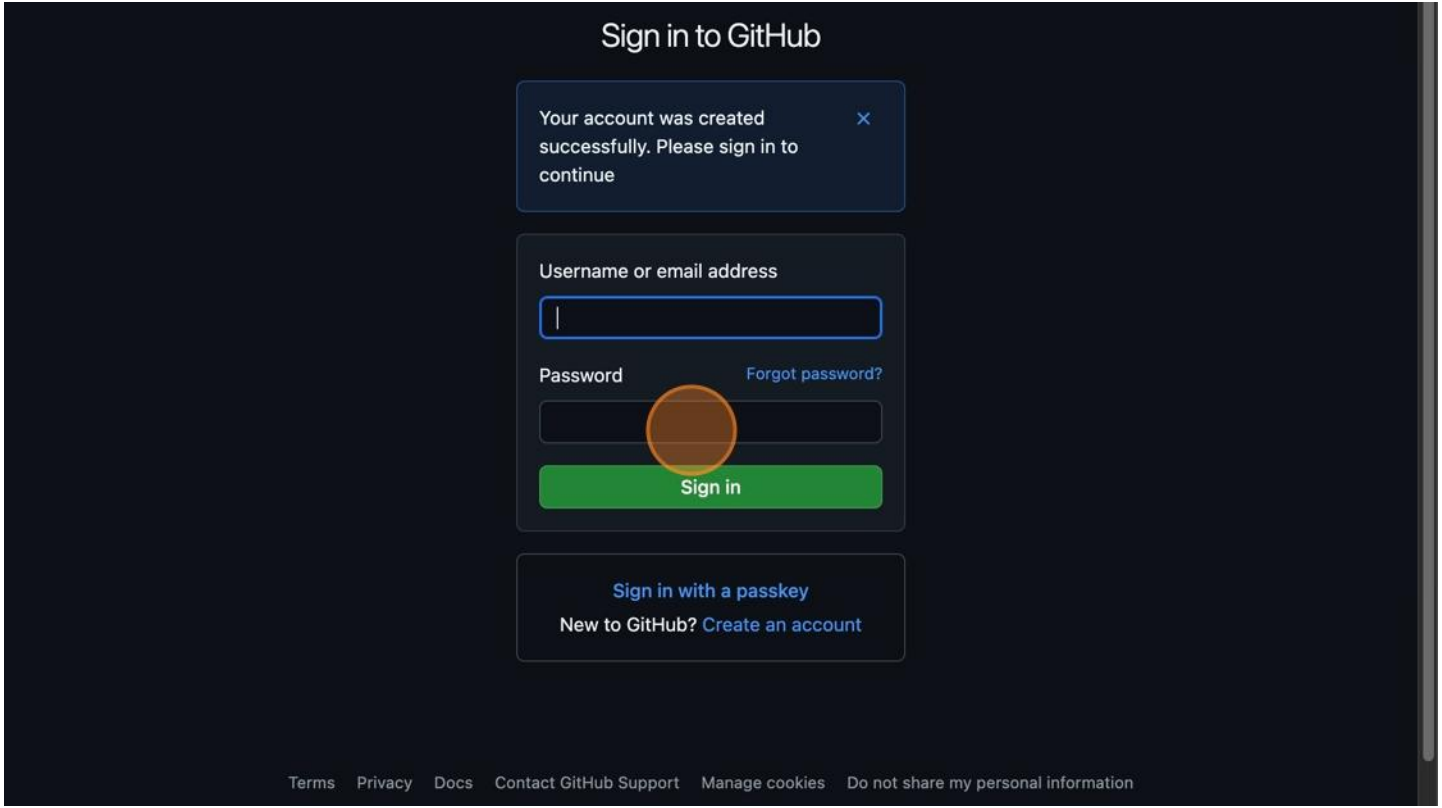

Tip: You can request a GitHu
education account later!

SACNAS CHAPTER
GSPD at UCD

Step 1: Sign up / log in & be mindful of your username as this will be your website name!

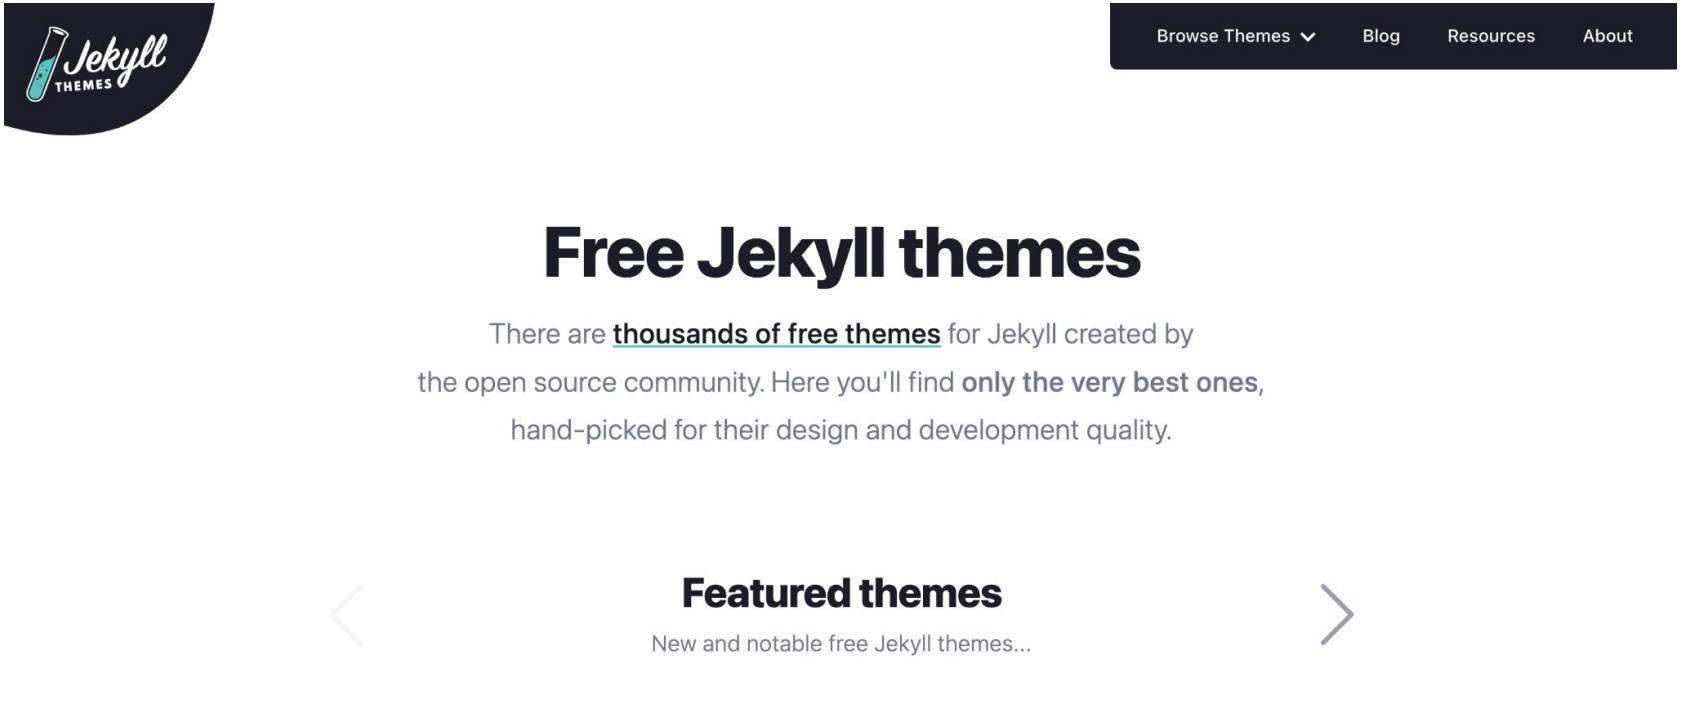

Step 1: Sign up / log in

Step 2: Fork a theme

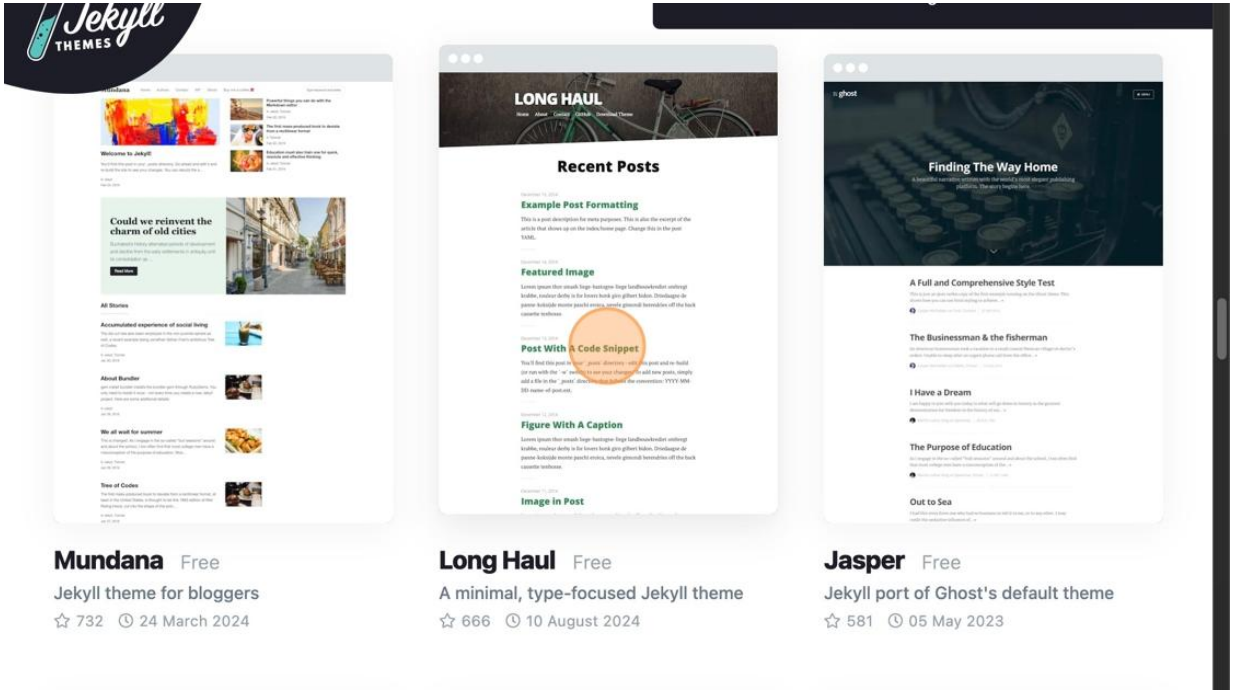

Navigate to https://jekyllthemes.io/free

https://jekyllthemes.io/free

Step 2: Fork a theme

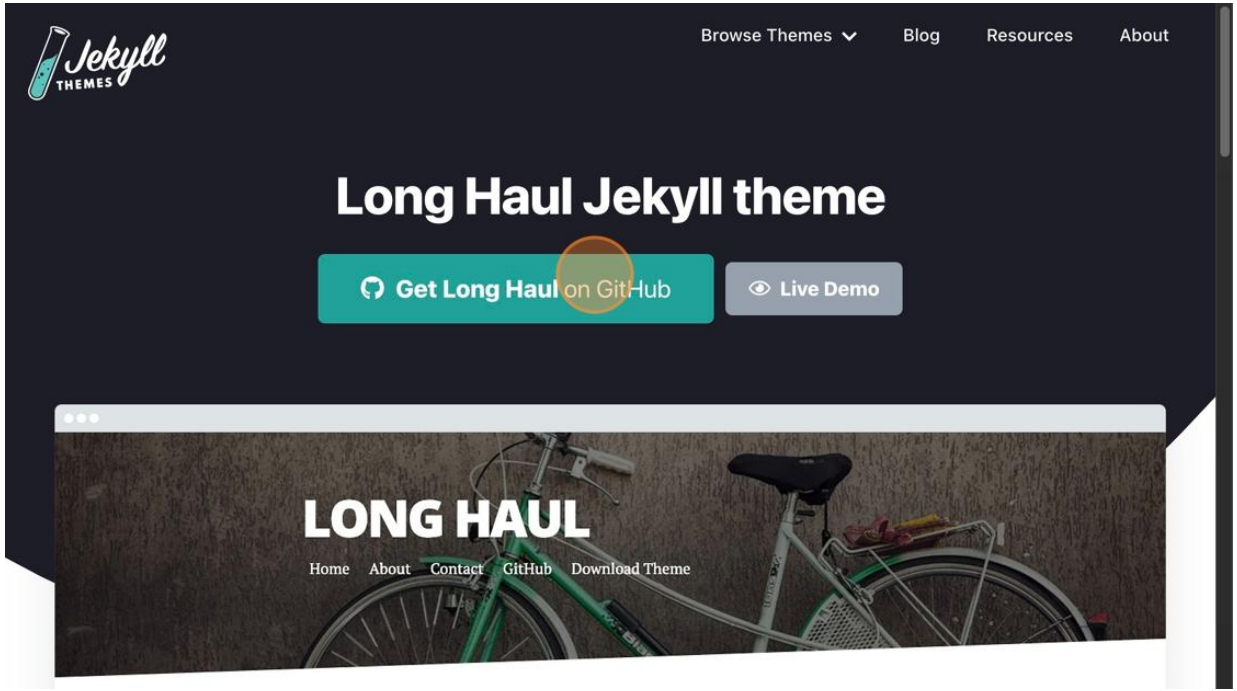

Select Long Haul

SACNAS CHAPTER
GSPD at UCD

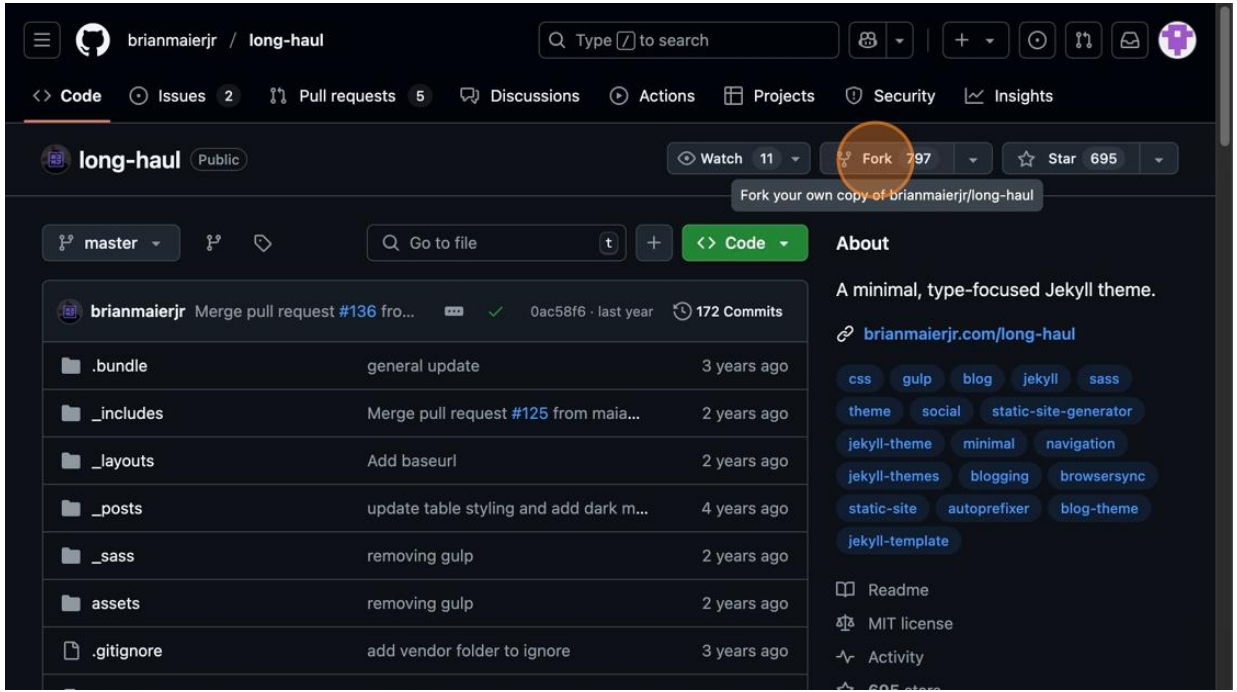

Step 2: Fork a theme

Click Get Long Haul on GitHub

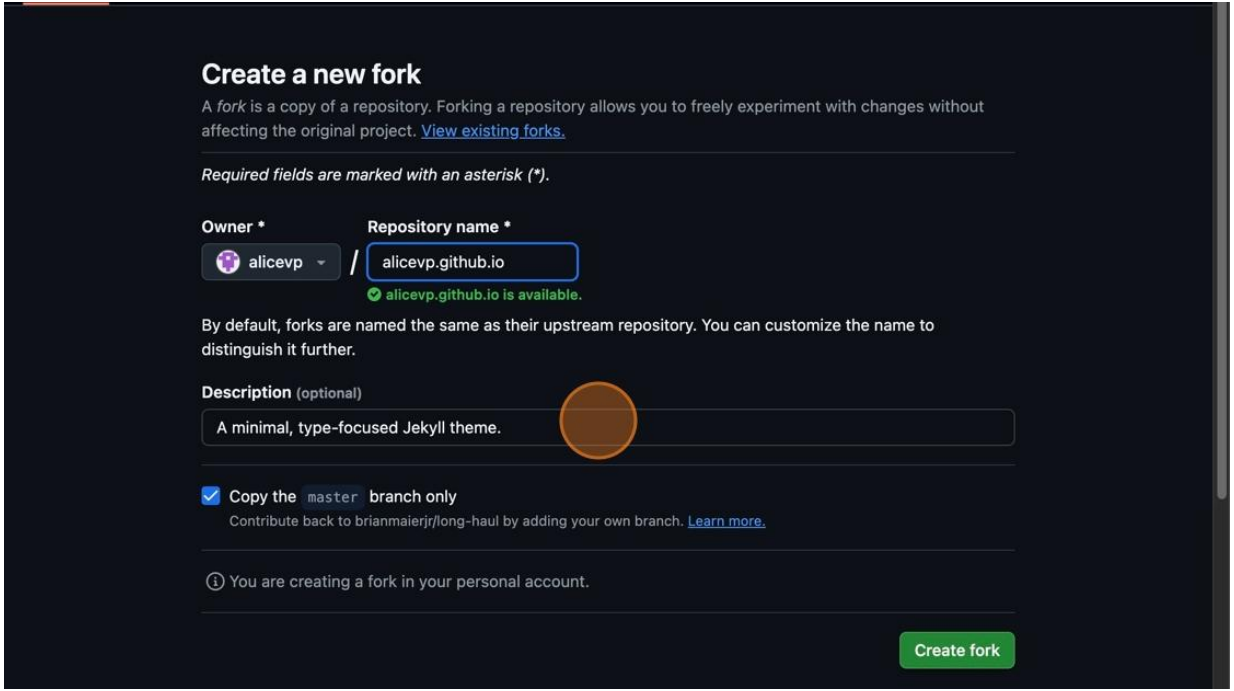

Step 2: Fork a theme

Fork Long Haul

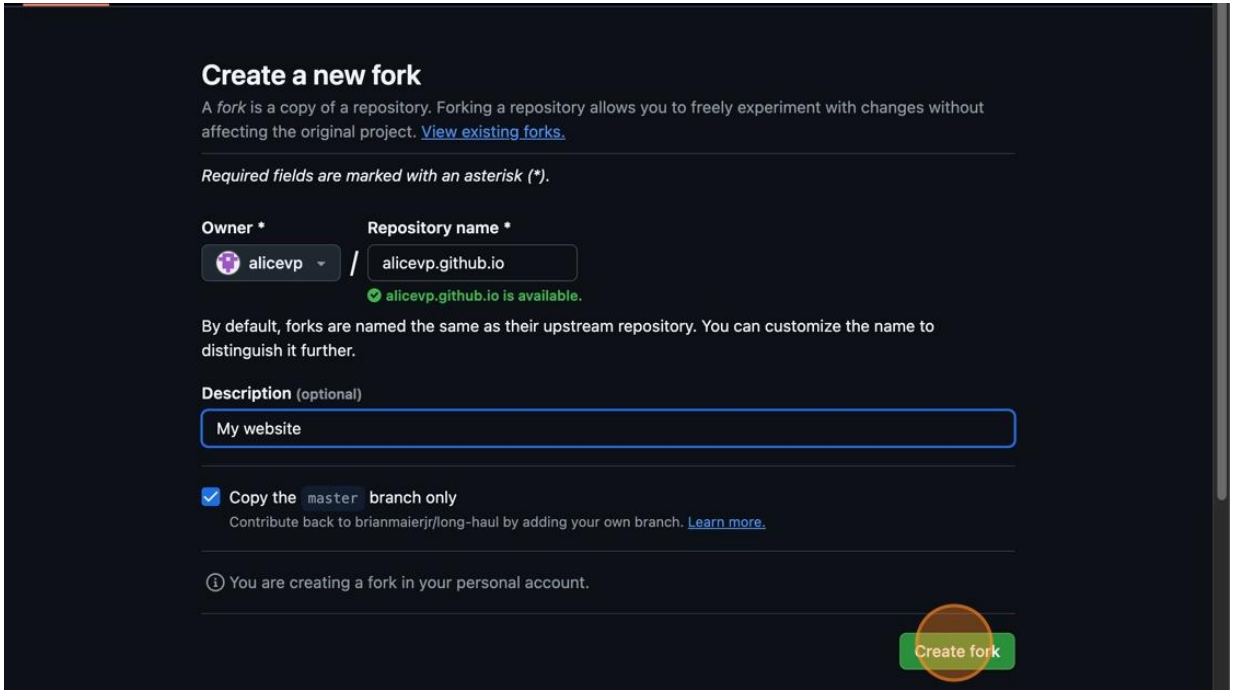

Step 2: Fork a theme

<u>IMPORTANT</u> STEP: change your repo name to *<user>.github.io*

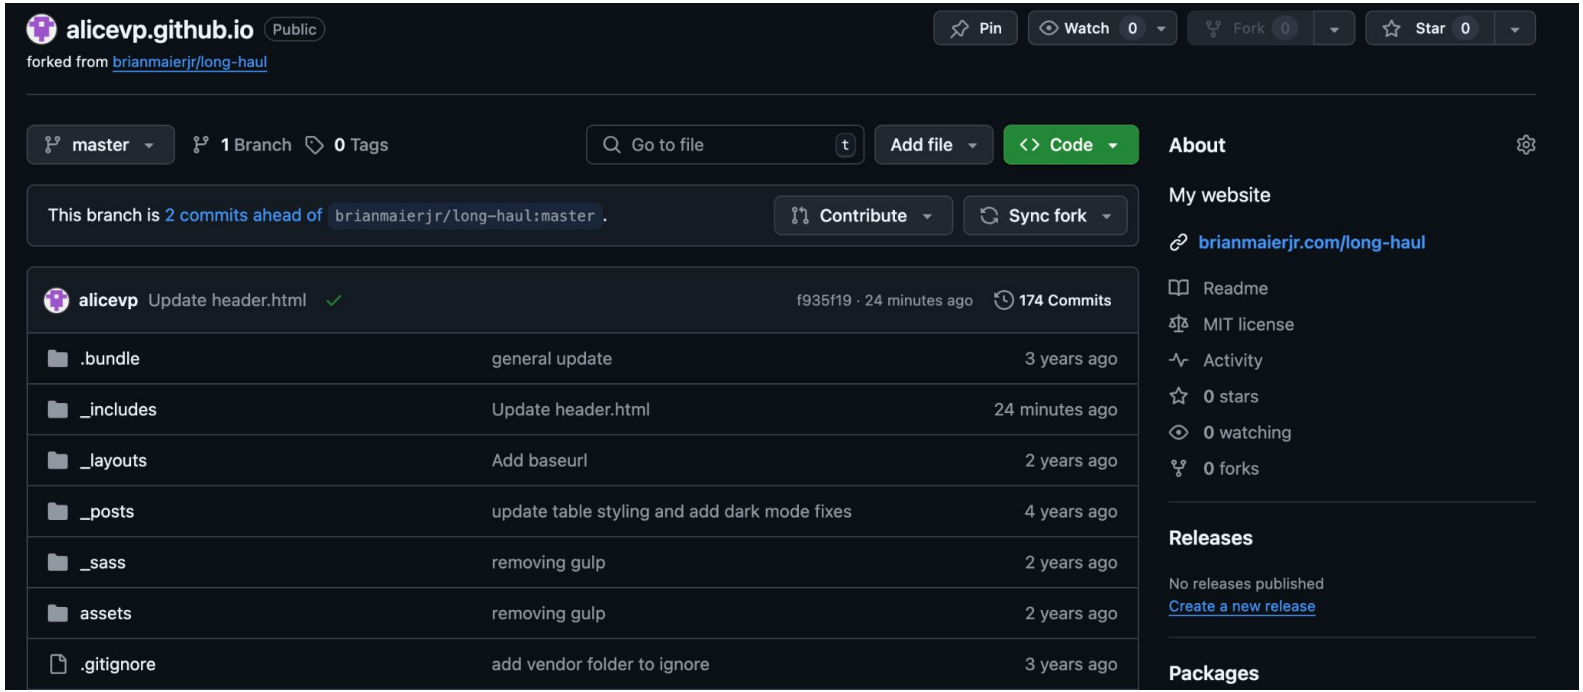

Step 2: Fork a theme

(optional): add/change the description

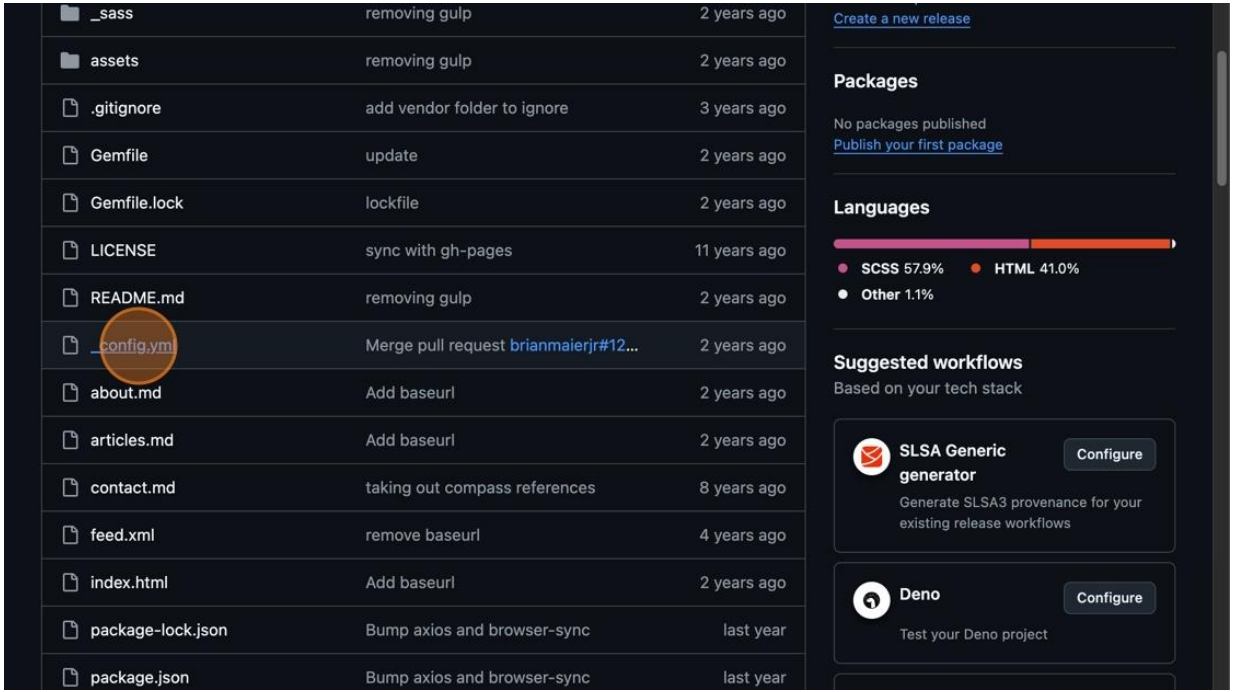

Step 3: Test the website

Congrats! You forked the repo

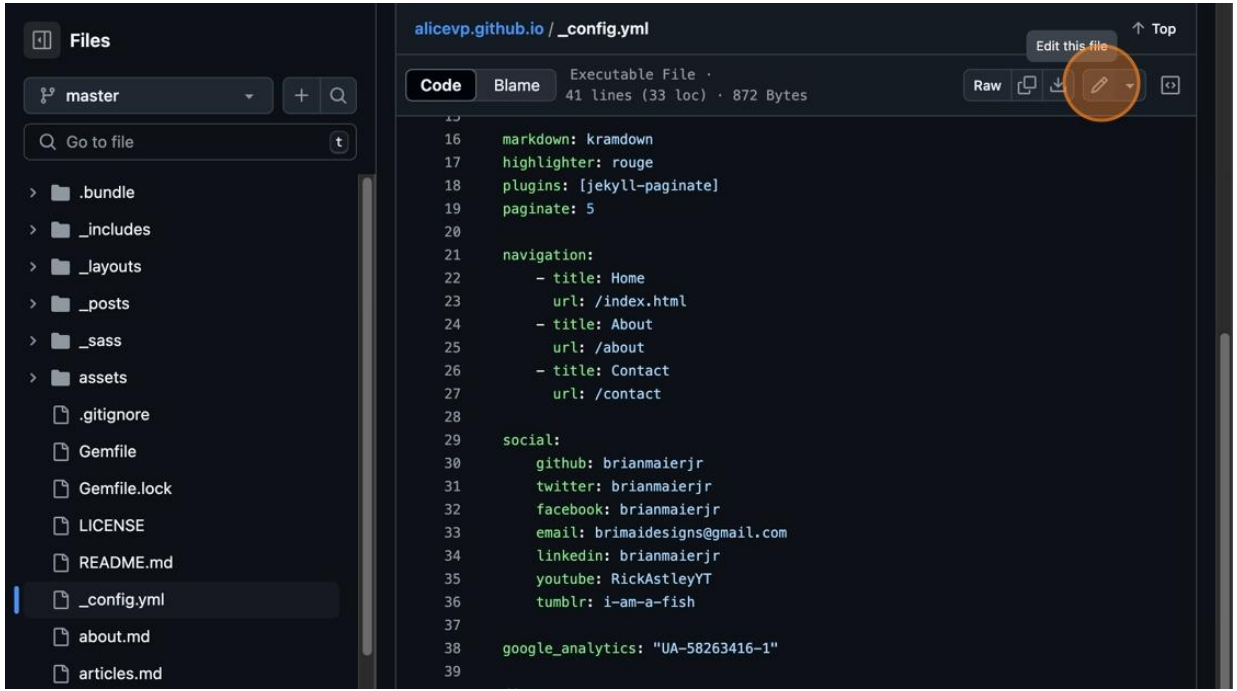

Step 3: Test the website

Navigate to the *_config.yml* file

Step 3: Test the website

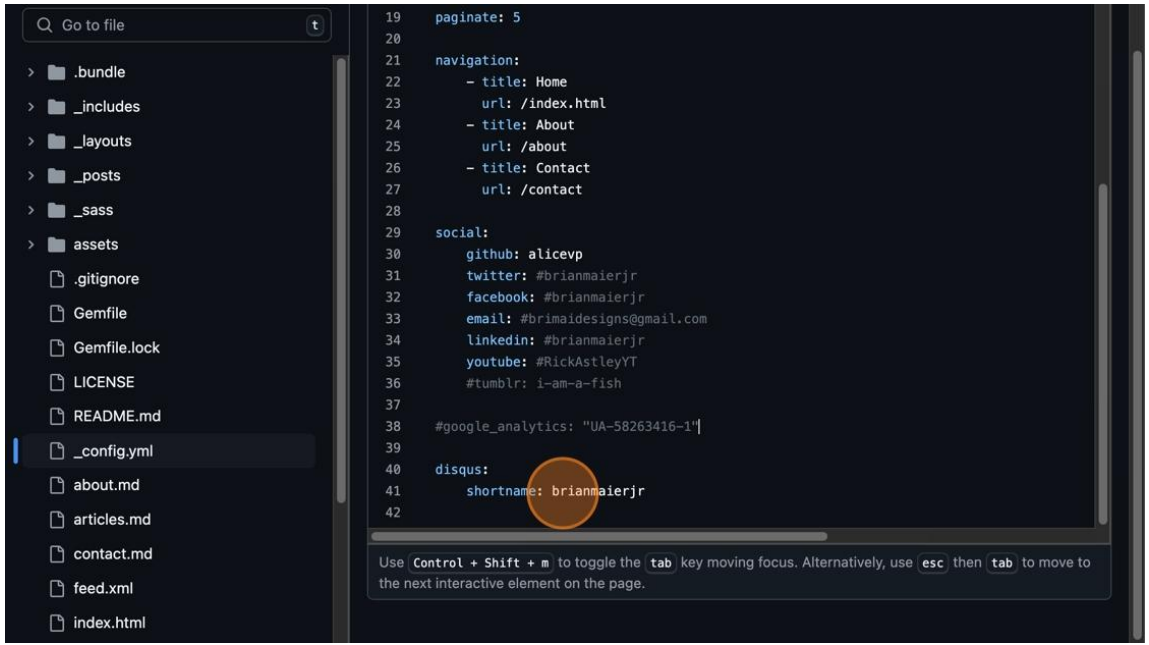

_config.yml: Click the edit button and edit away!

Step 3: Test the website

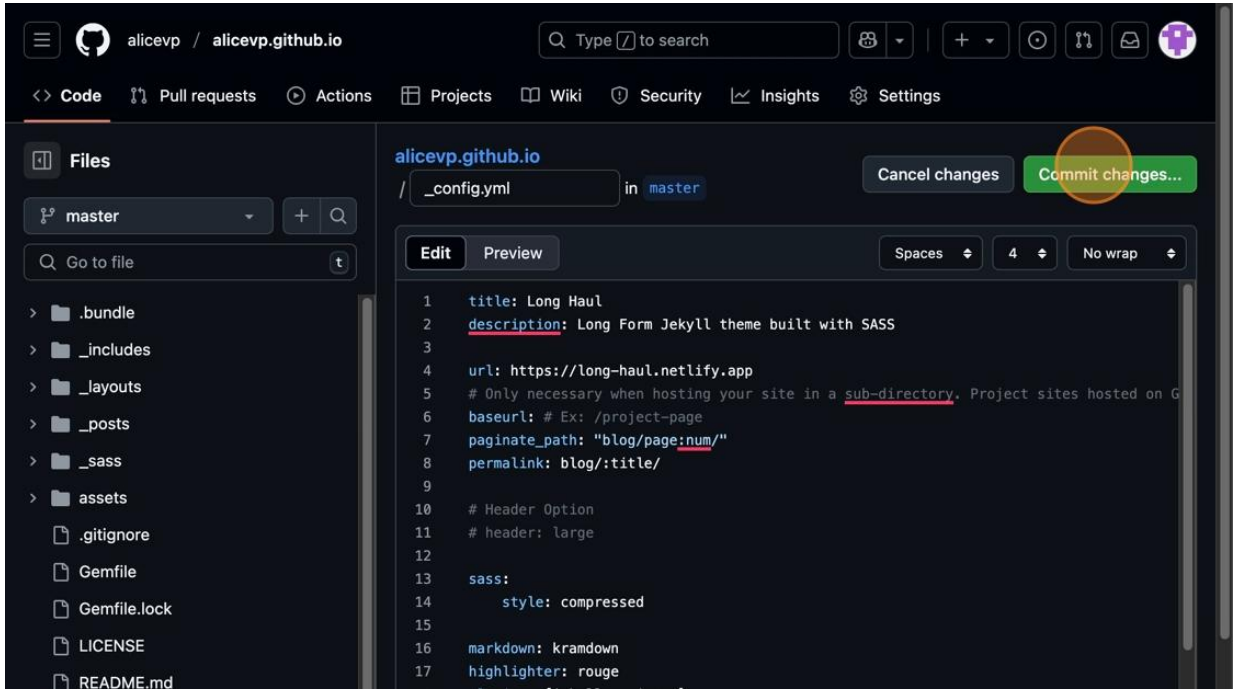

_config.yml: example

- Change *title* to your name/website name
- Change socials
- Change shortname
- Keep navigation the same for now!

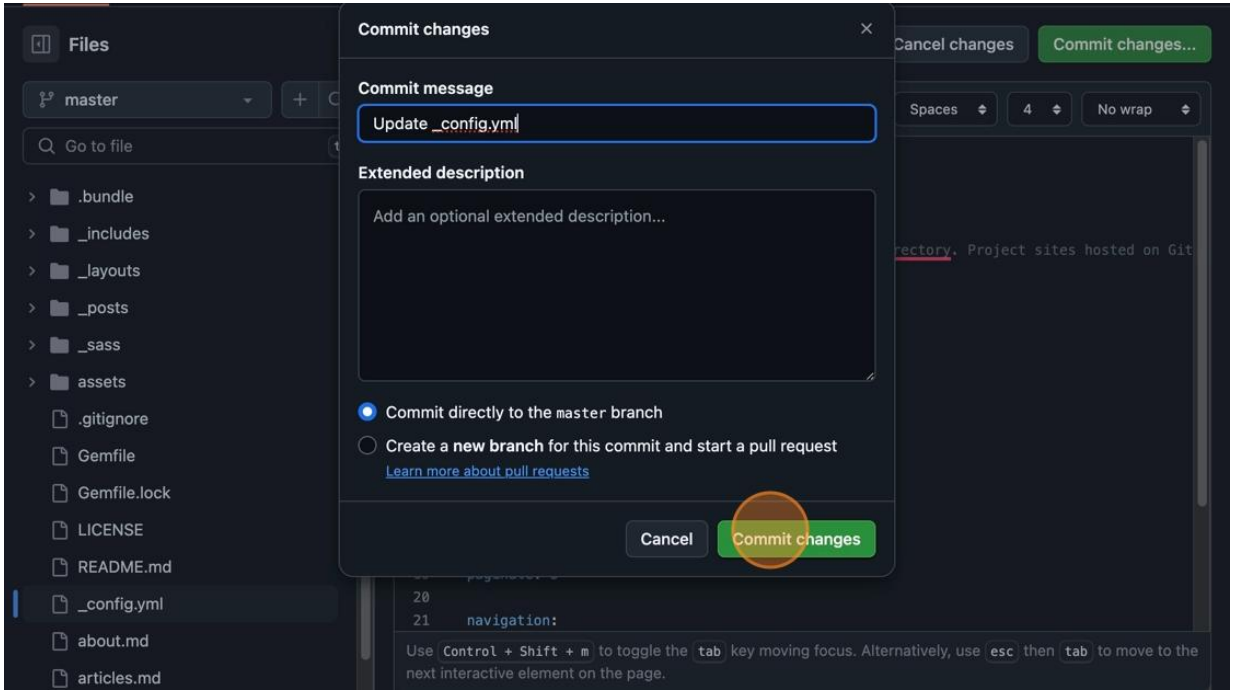

Step 3: Test the website

_config.yml: commit changes

Step 3: Test the website

_config.yml: commit changes

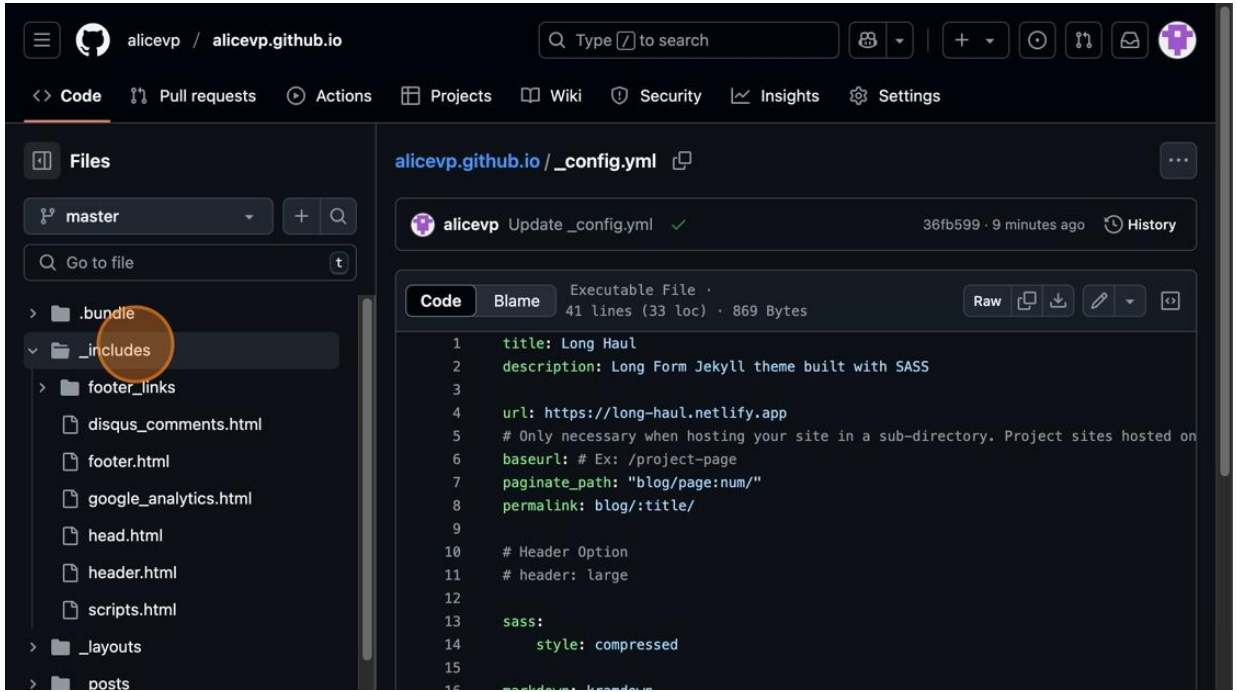

Step 3: Test the website

You can check your website now :)

Type into the browser *<user>.github.io*

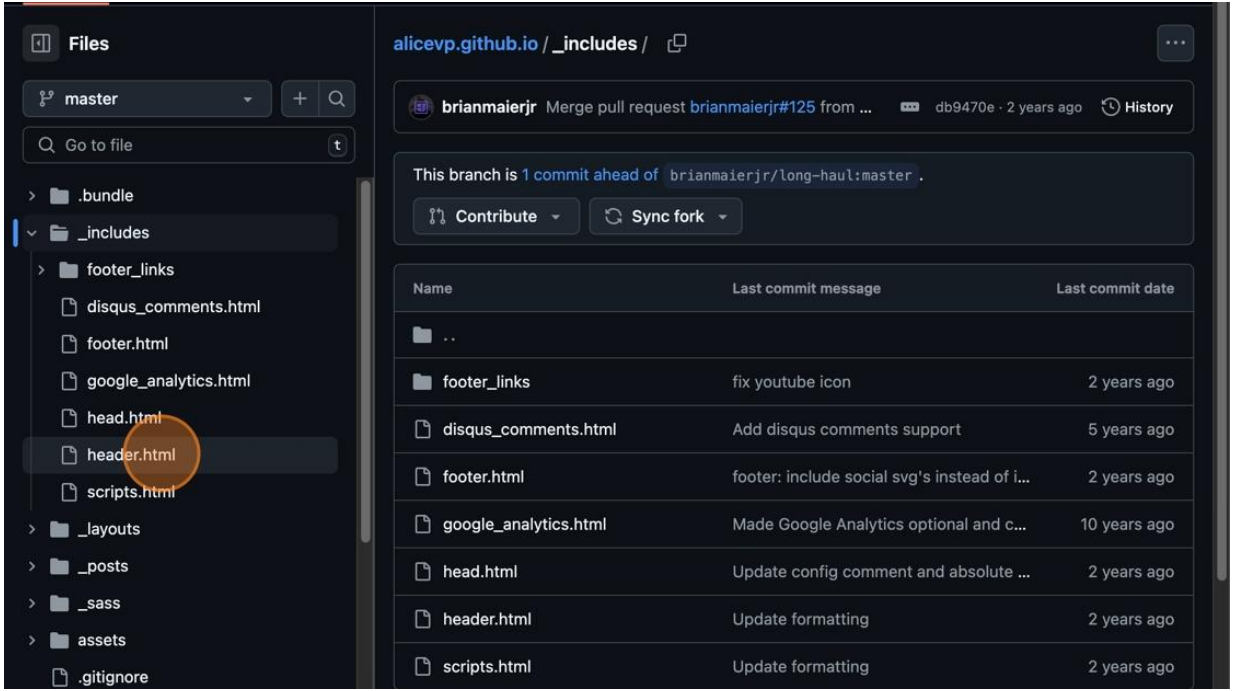

Step 4: Removing dev information

Navigate to *_includes* folder

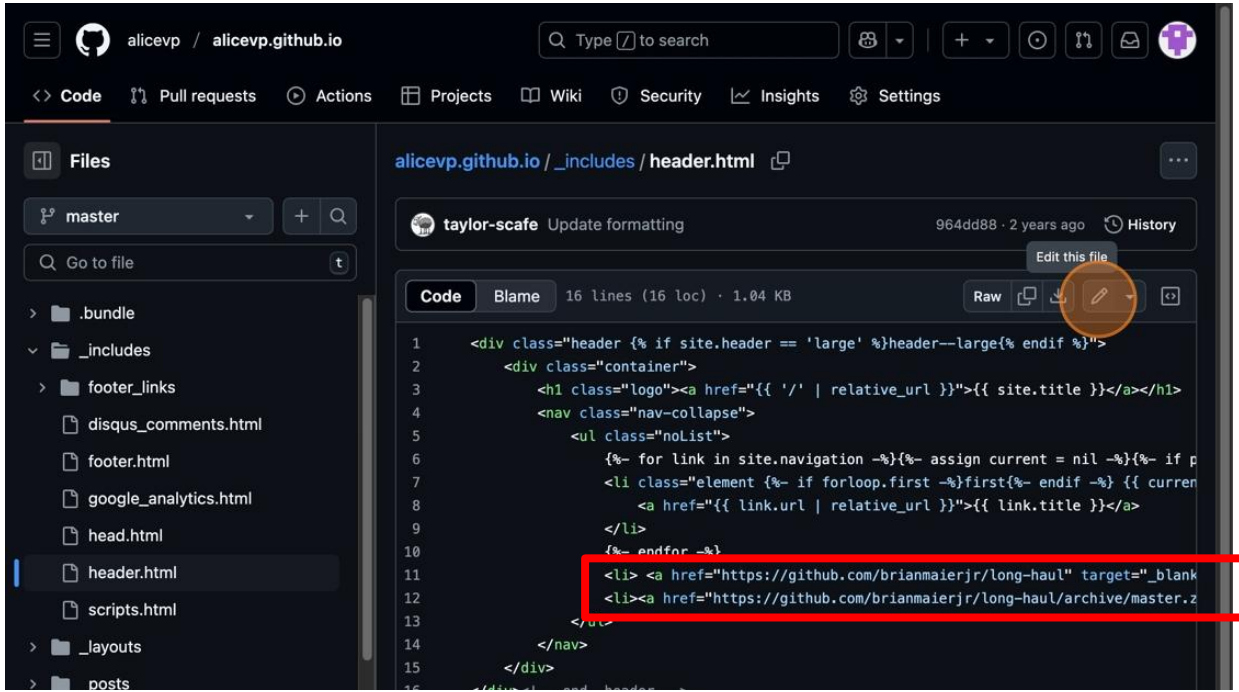

Step 4: Removing dev information

Navigate to *header.html*

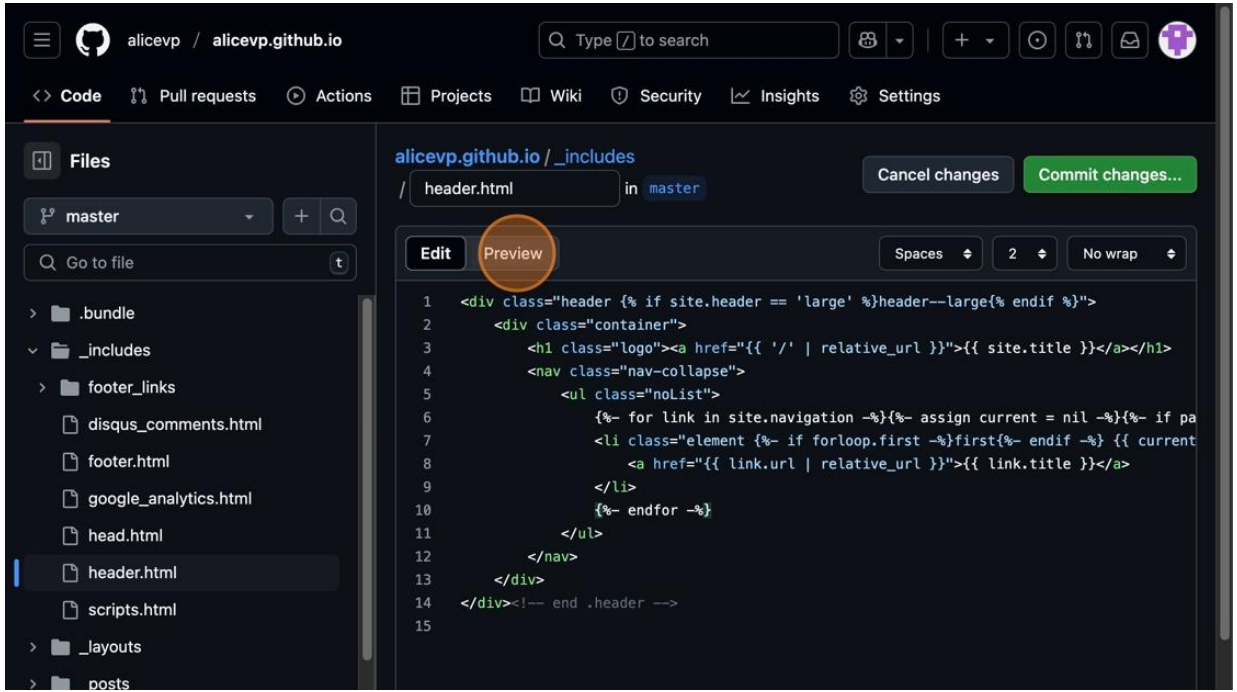

Step 4: Removing dev information

header.html : edit & remove dev repo

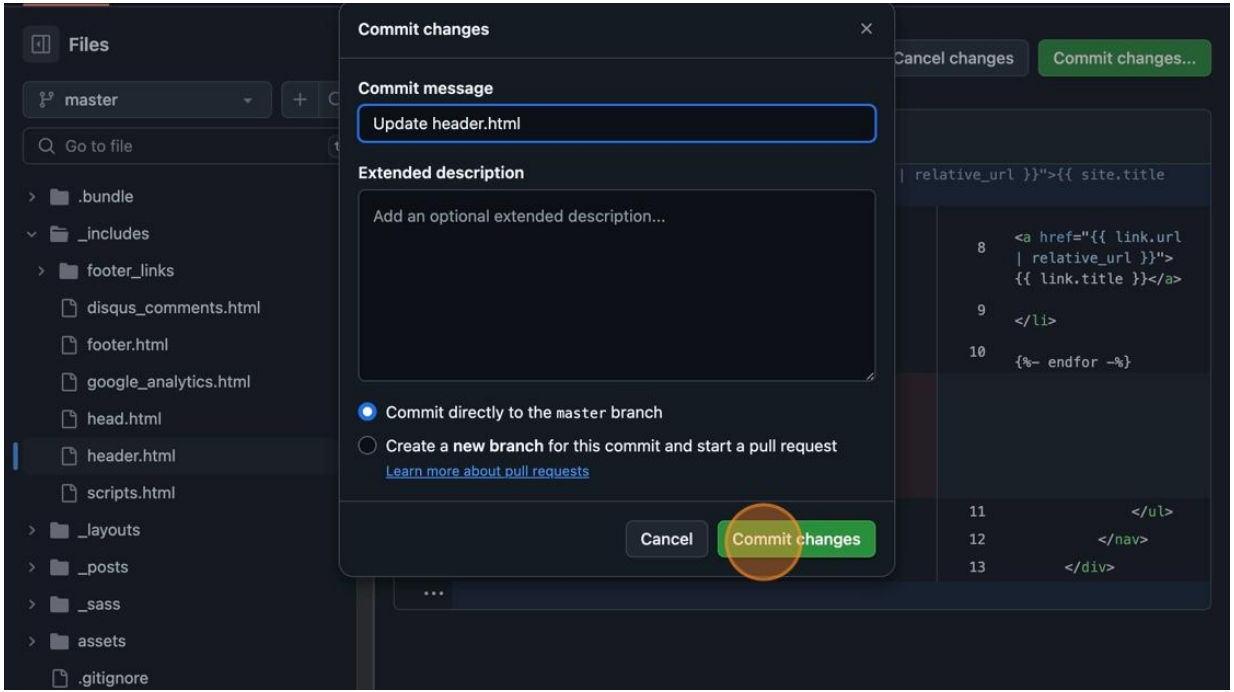

Step 4: Removing dev information

header.html : edit & remove dev repo

Step 4: Removing dev information

header.html : edit & remove dev repo

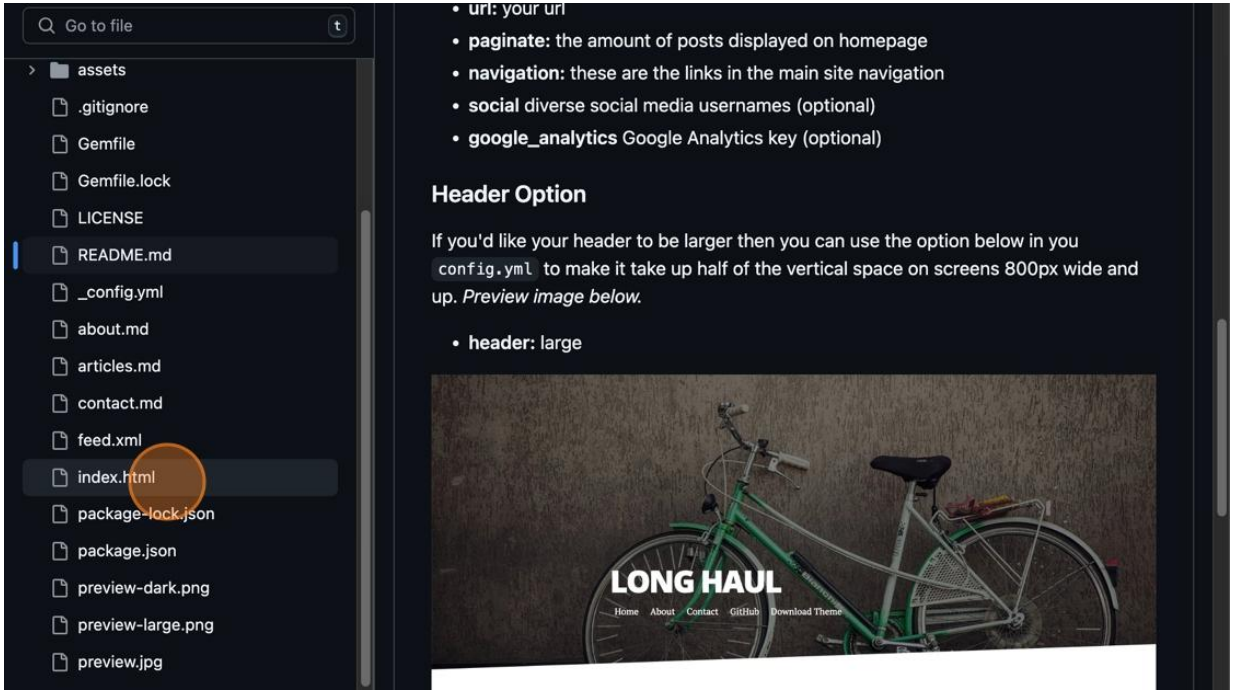

Step 4: Removing dev information

header.html : edit & remove dev repo

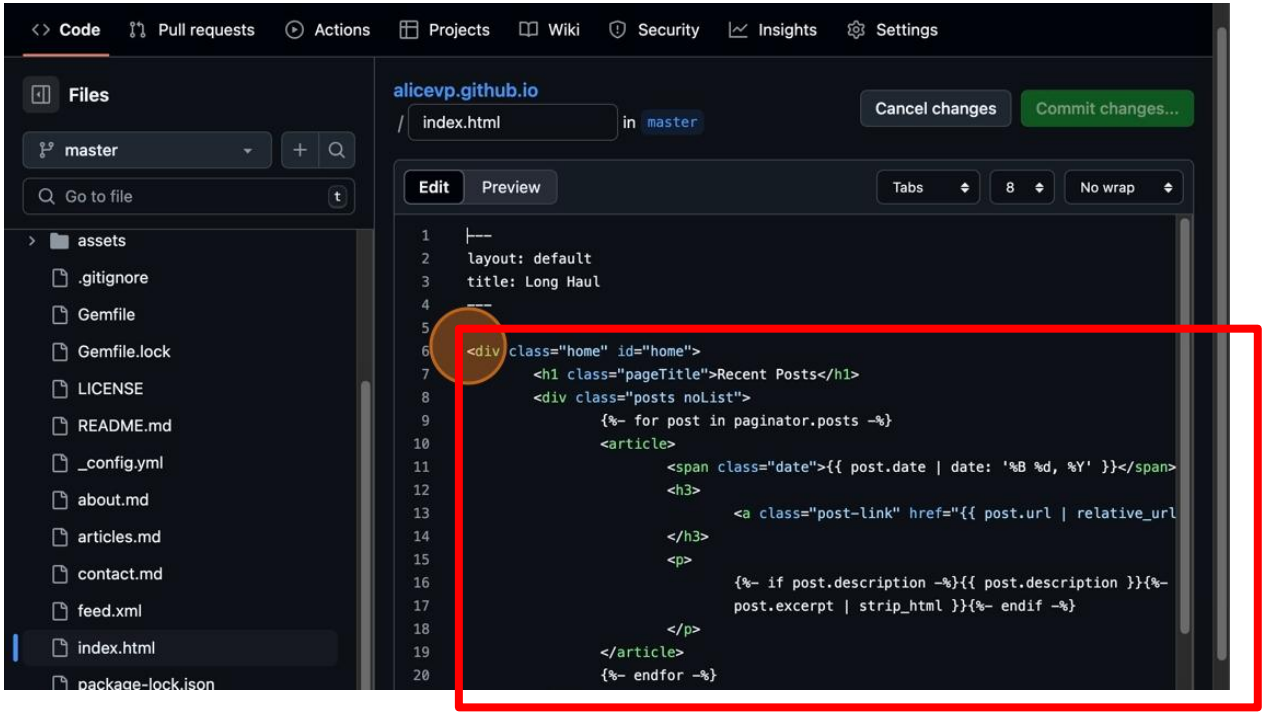

Step 5: (Optional) Remove “recent posts” from home

Navigate to *index.html*

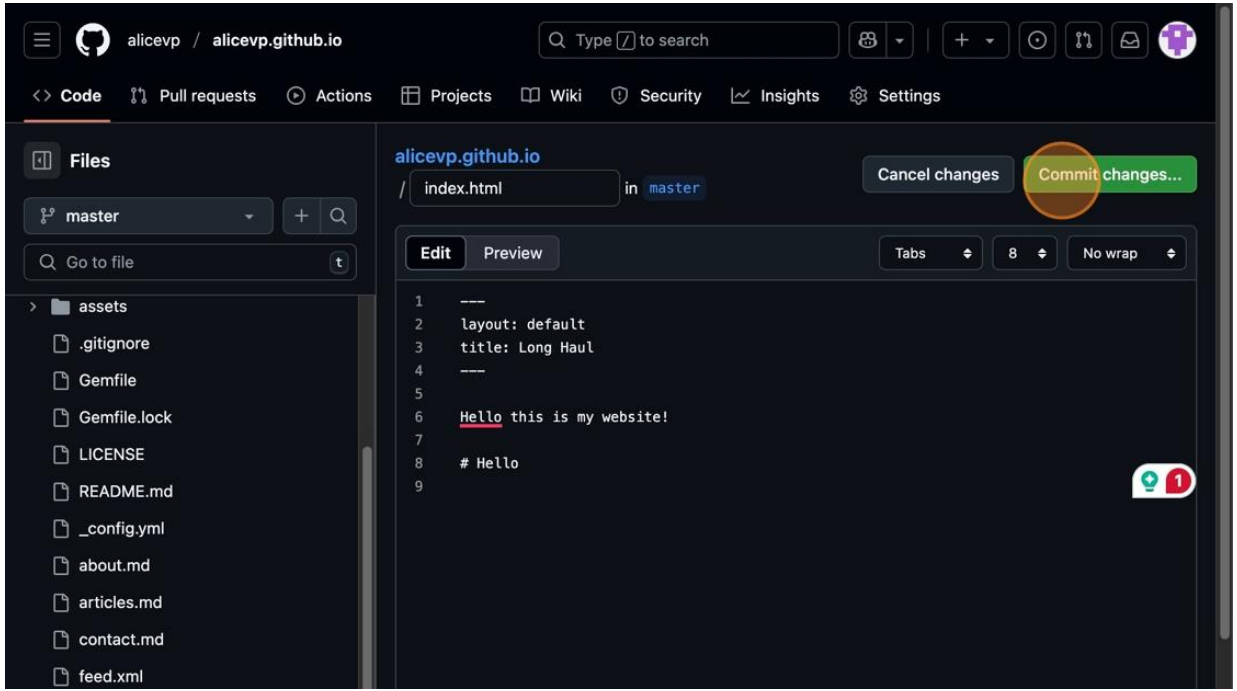

Step 5: (Optional) Remove “recent posts” from home

Index.html: Delete everything after the divider

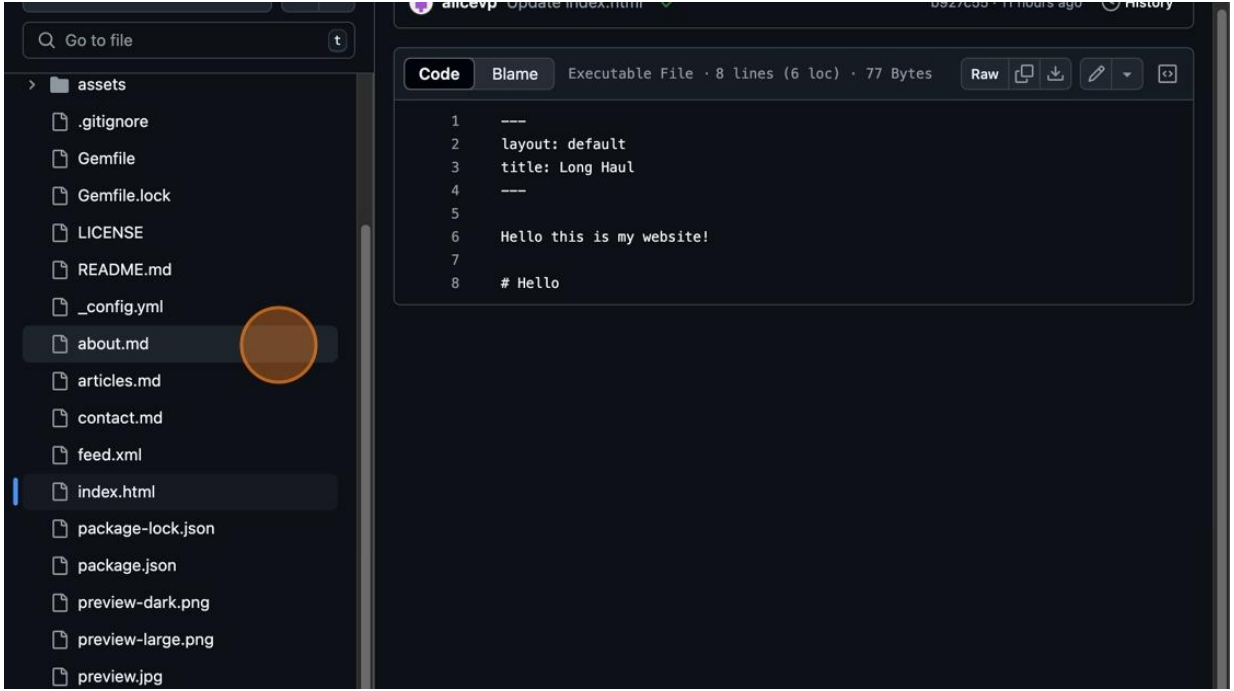

Step 5: (Optional) Remove “recent posts” from home

Index.html:

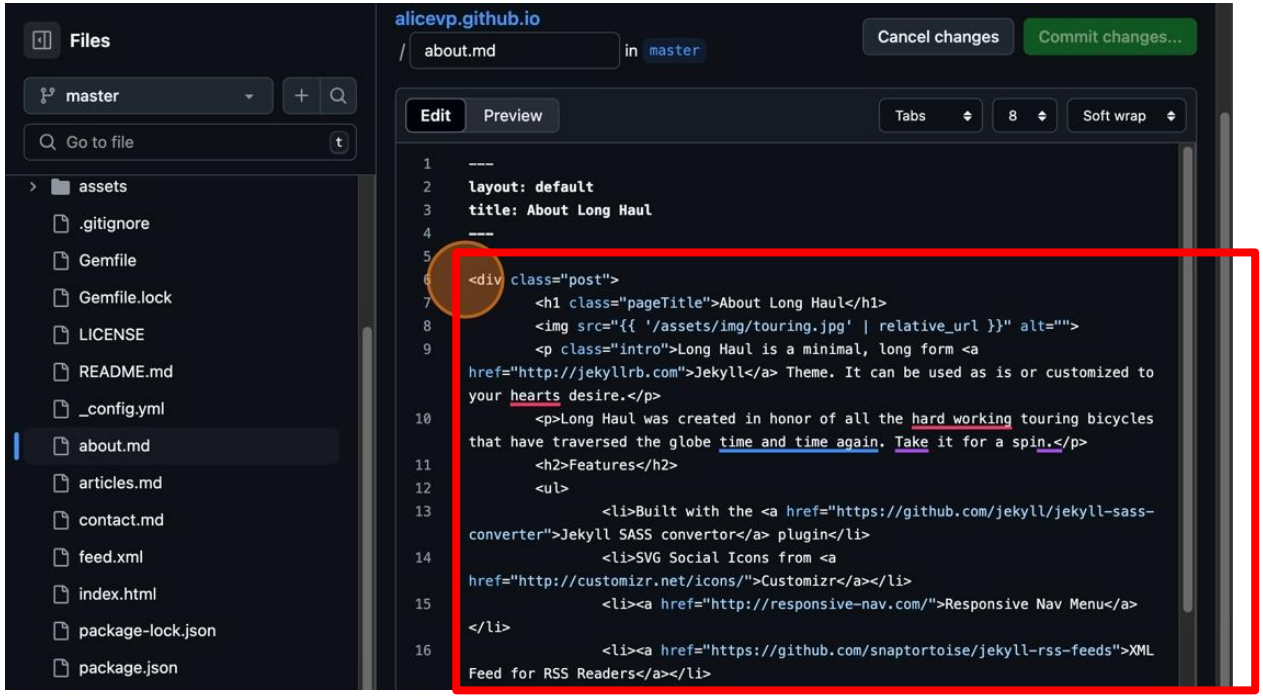

Step 6: Editing Markdown files

Navigate to *about.md*

Step 6: Editing Markdown files

about.md: Delete everything after the divider

Step 6: Editing Markdown files

Markdown crash course

Element	Markdown Syntax

Heading	`# H1`
	`## H2`
	`### H3`

Bold	`**bold text**`
Italic	`*italicized text*`
Blockquote	`> blockquote`

Ordered List	`1. First item`
	`2. Second item`
	`3. Third item`

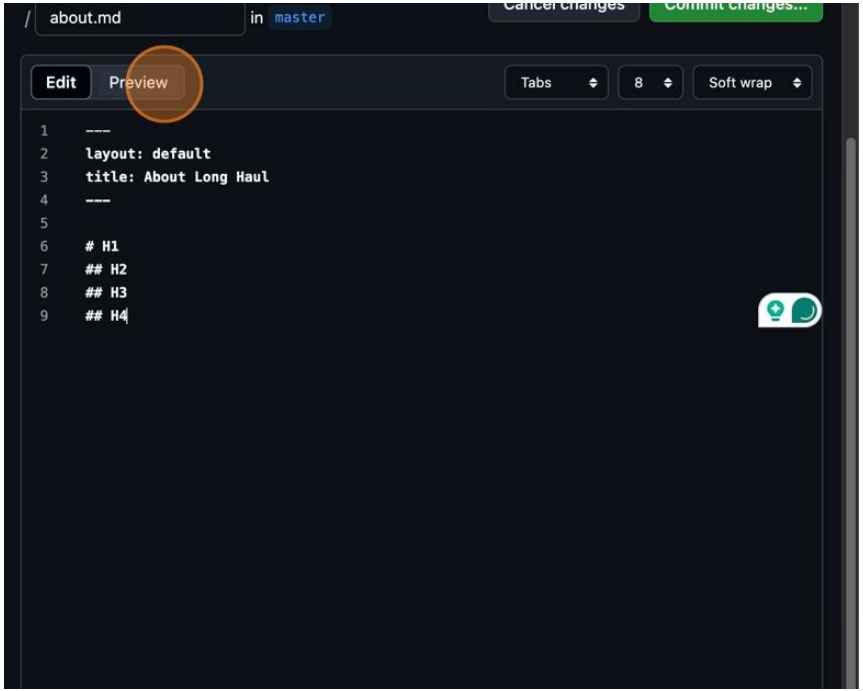

Unordered List	`- First item`
	`- Second item`
	`- Third item`

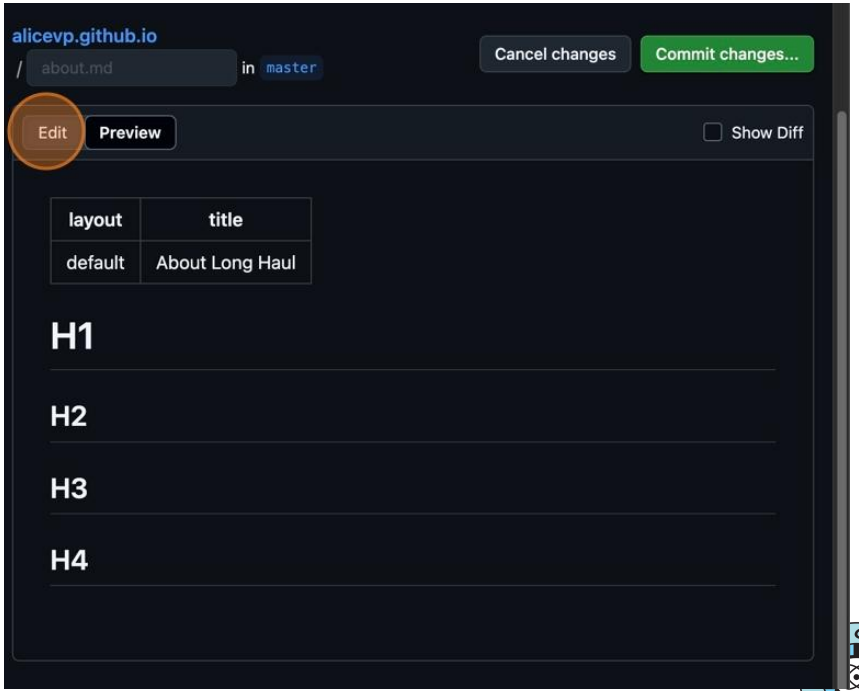

Code	`` `code` ``
Horizontal Rule	`---`
Link	`[title](https://www.example.com)`
Image	`![alt text](image.jpg)`

https://www.markdownguide.org/cheat-sheet/

Step 6: Editing Markdown files

about.md:

Step 6: Editing Markdown files

about.md: adding images and links

- Images syntax: ![img](assets/img/img.jpg)
- Links syntax: Check out my [link](link.md)

Live demo?

https://github.com/alicevp/alicevp.github.io/blob/master/about.md?plain=1

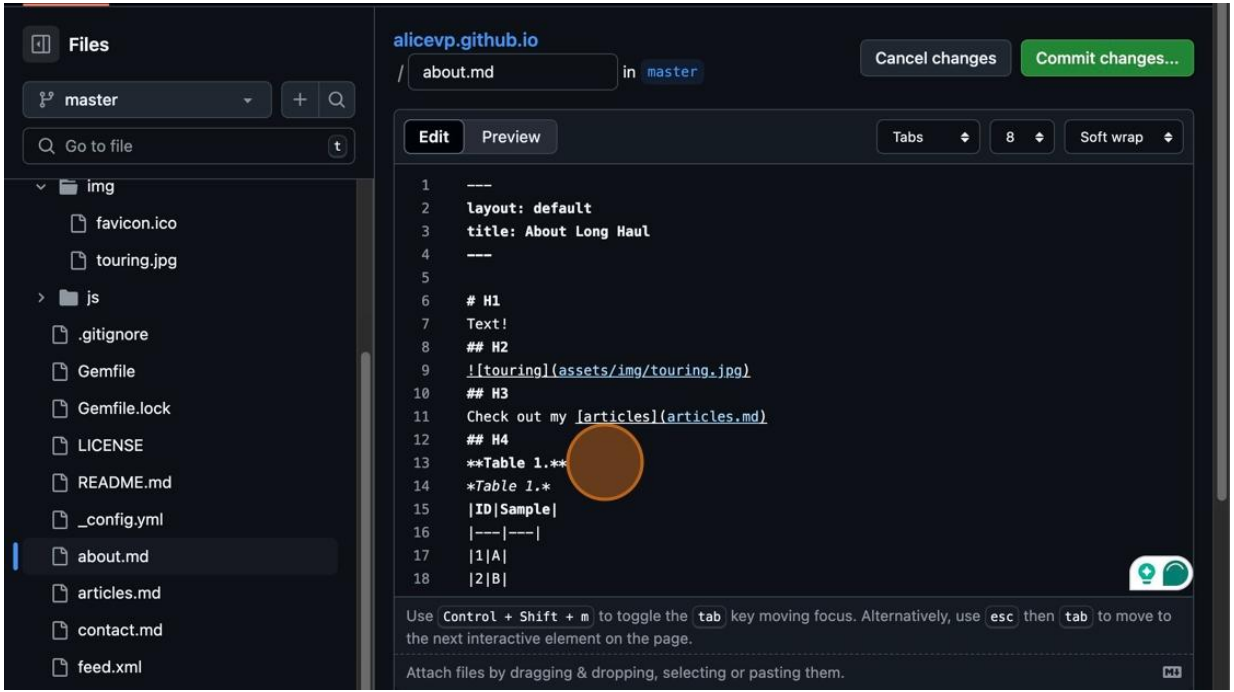

Step 6: Editing Markdown files

about.md: formatting text & adding tables

** text ** : bold
* text * : italics

Table:

col1	col2
row1	entry1
row2	entry2

Step 6: Editing Markdown files

about.md: formatting text & adding tables

** text ** : bold
* text * : italics

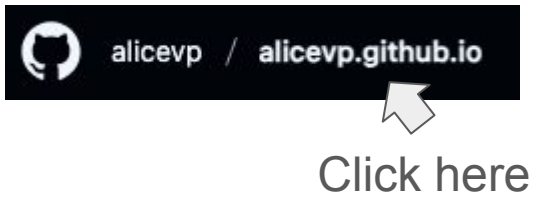

Table:

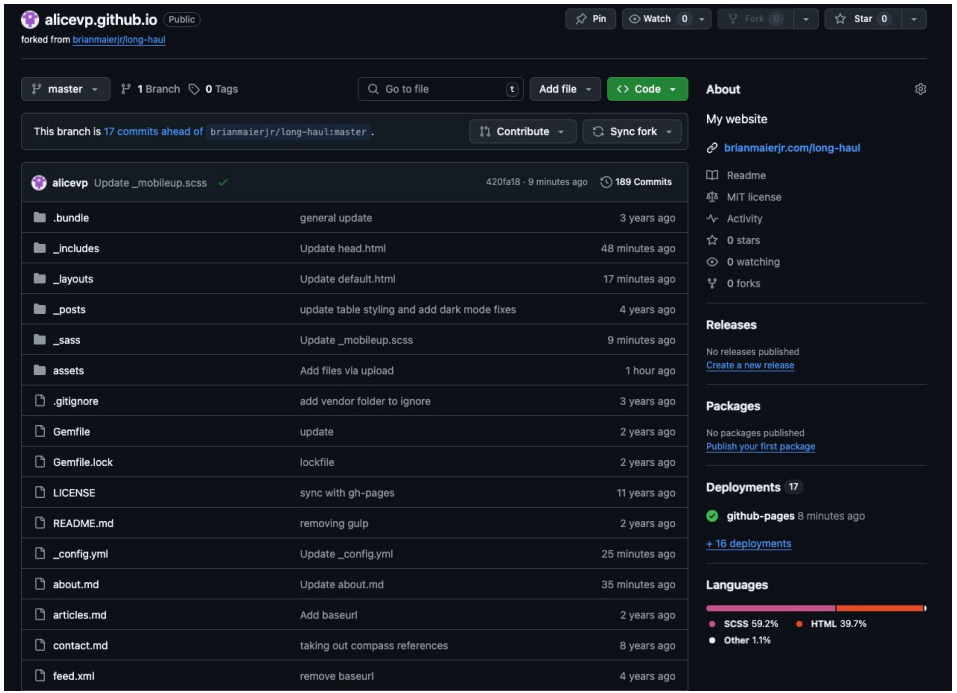

col1	col2
row1	entry1
row2	entry2

Step 7: Add more pages on the Navigation Bar

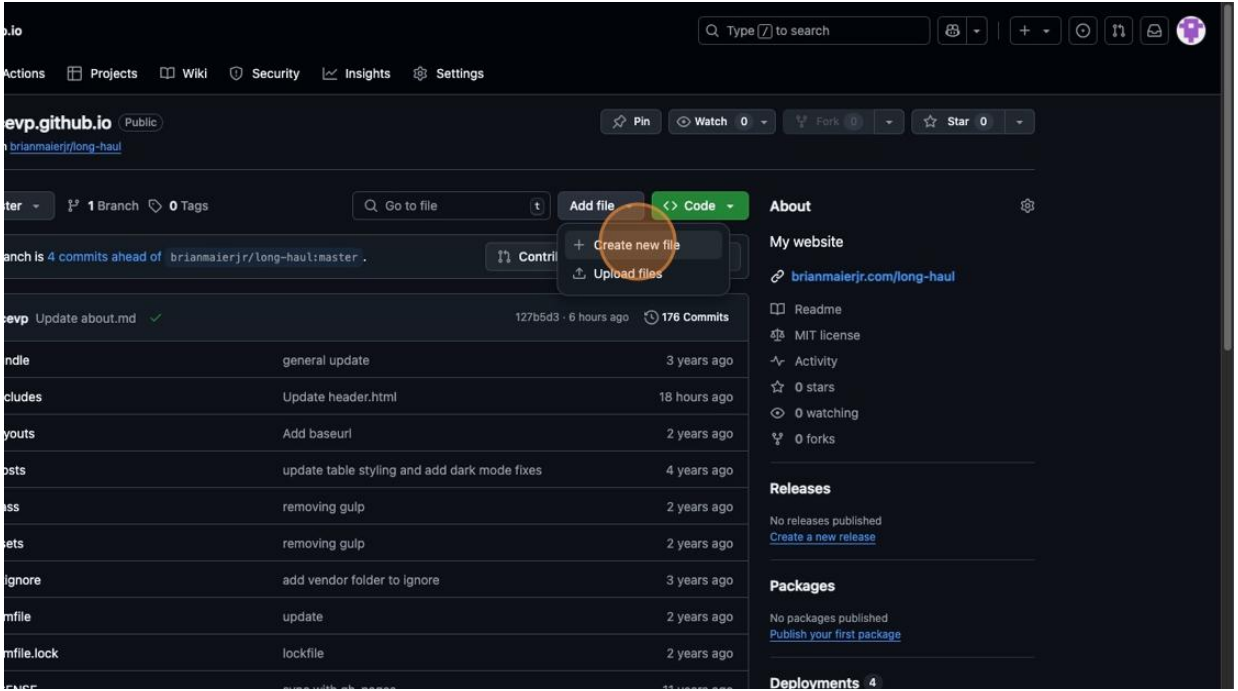

Navigate to *your repository*

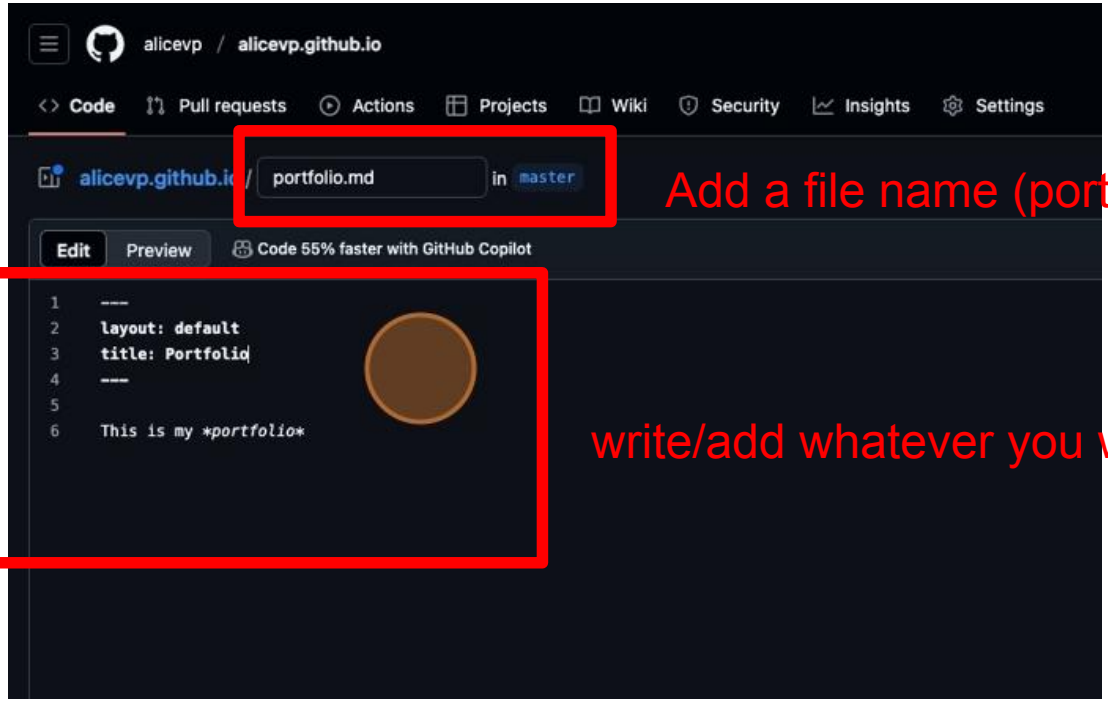

Step 7: Add more pages on the Navigation Bar

Click add file, create new file

Step 7: Add more pages on the Navigation Bar

New file: *portfolio.md*

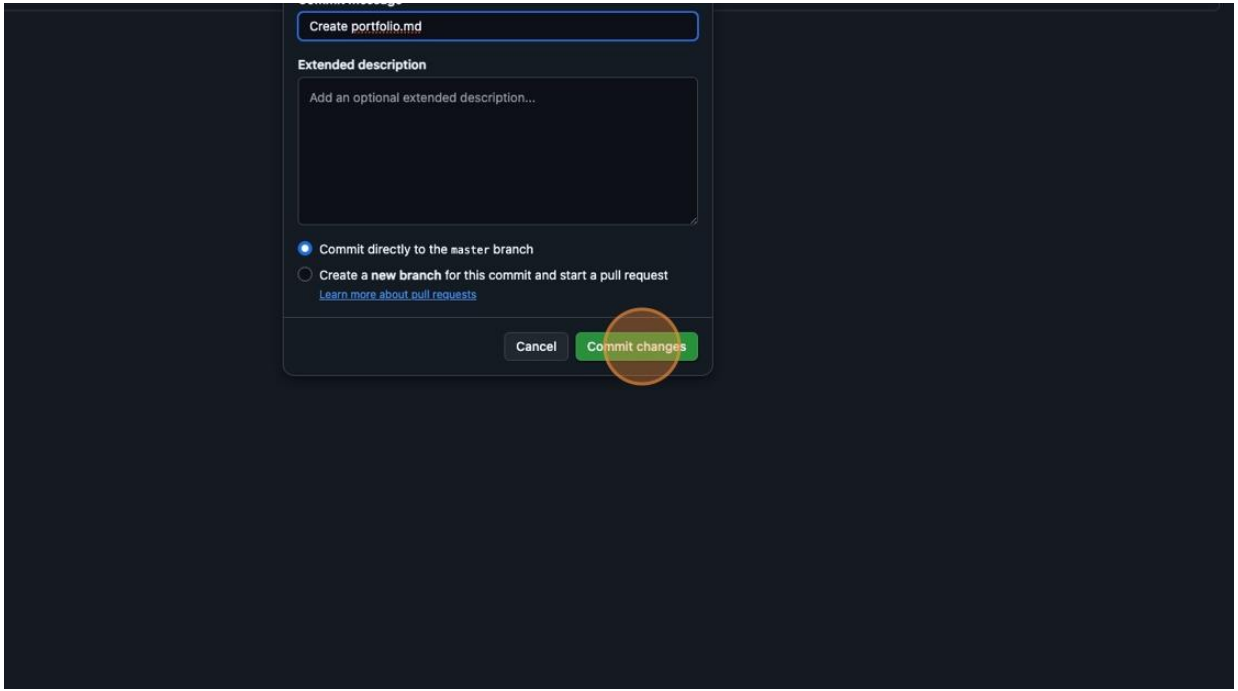

Add a file name (portfolio.md)

Add layout info

write/add whatever you want here!

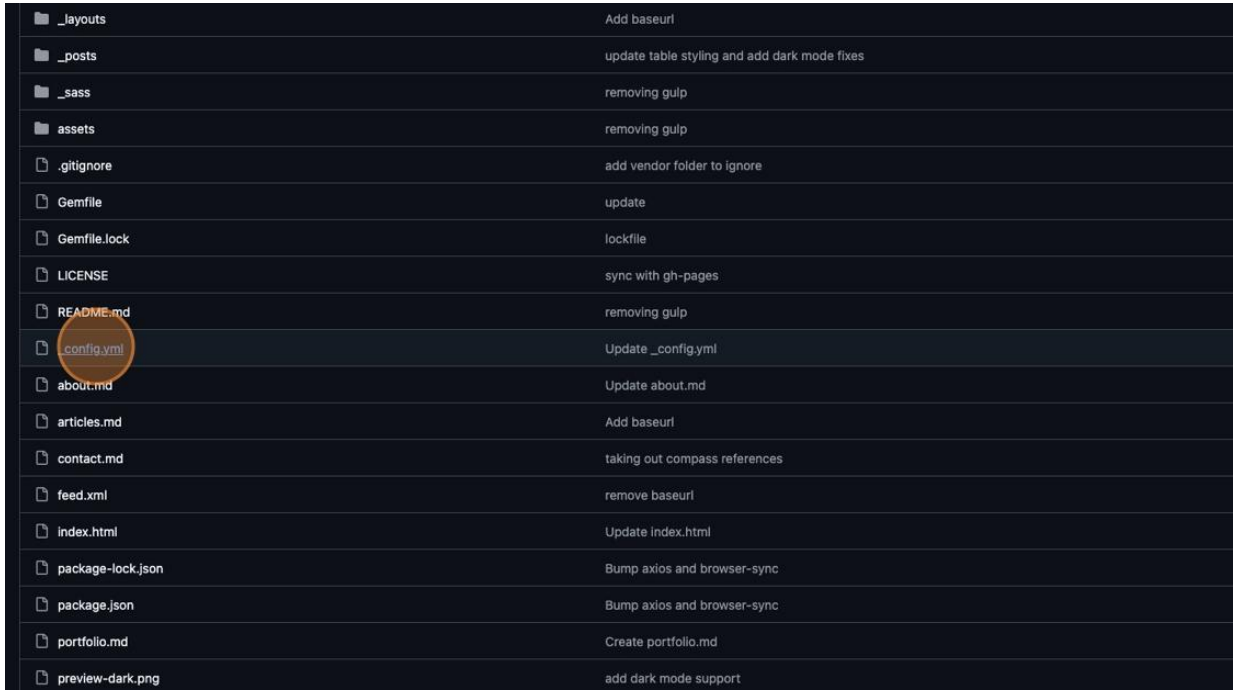

Step 7: Add more pages on the Navigation Bar

portfolio.md : commit changes

Step 7: Add more pages on the Navigation Bar

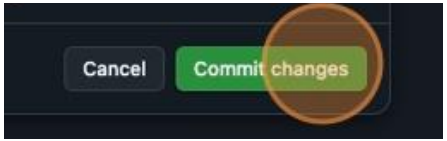

Navigate to *_config.yml*

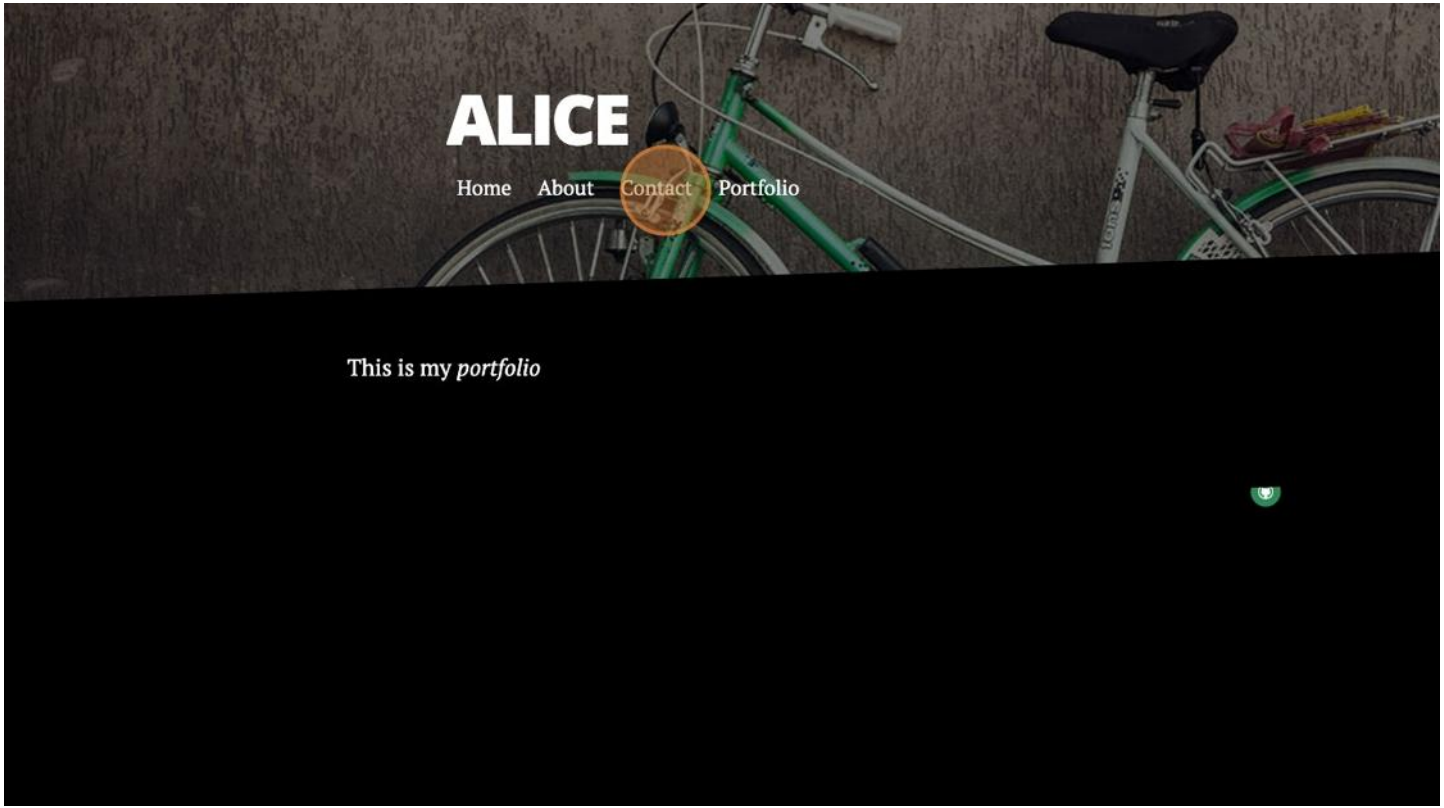

Step 7: Add more pages on the Navigation Bar

Navigate to *_config.yml*

```yaml
navigation:
    - title: Home
      url: /index.html
    - title: About
      url: /about
    - title: Contact
      url: /contact
    - title: Portfolio
      url: /portfolio
```

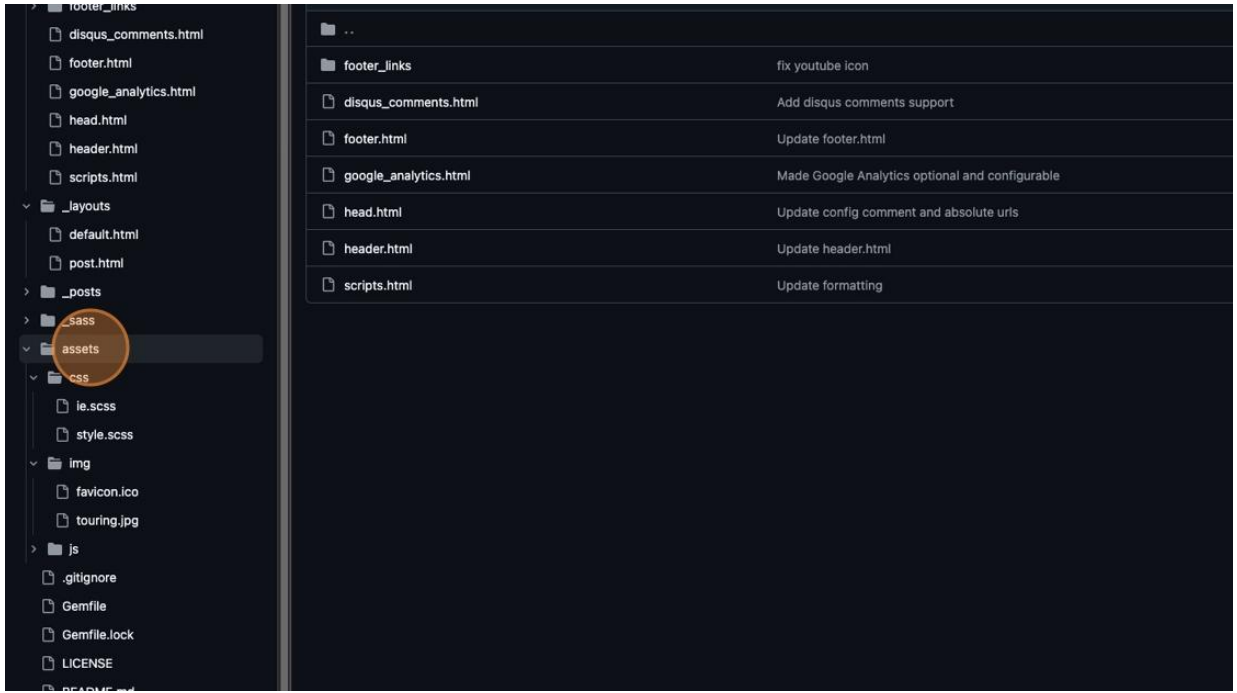

Step 7: Add more pages on the Navigation Bar

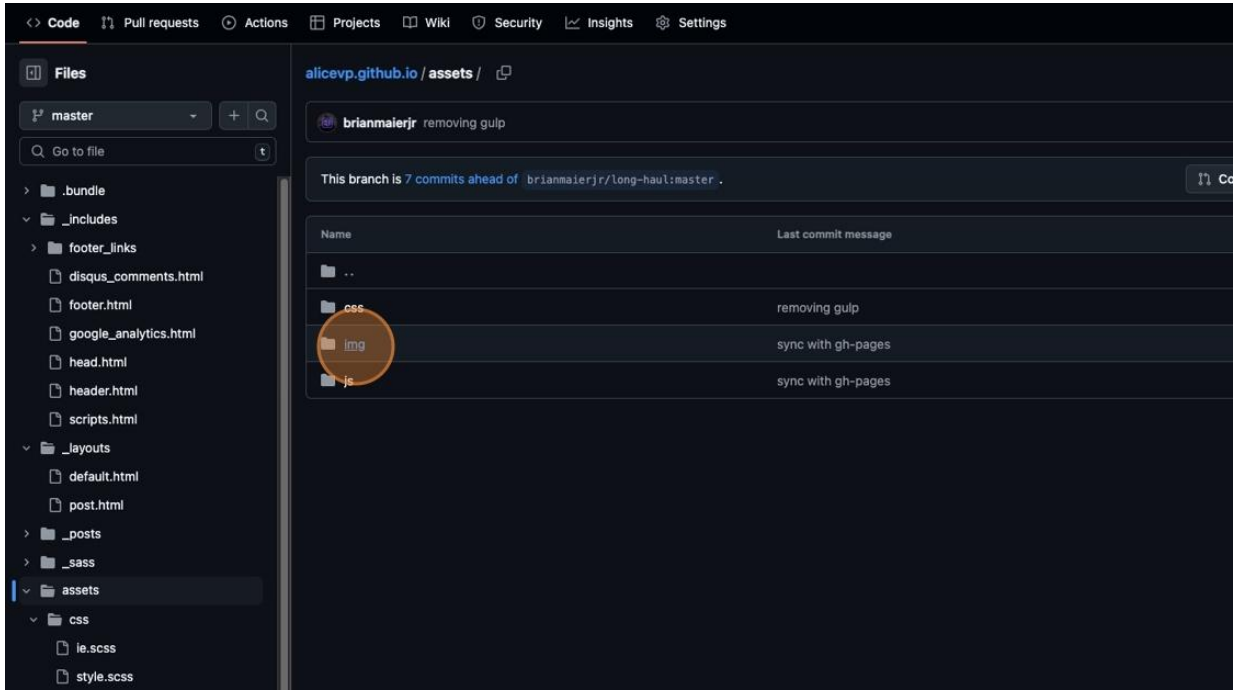

Step 8: Change Header Image

Upload an image

Step 8: Change Header Image

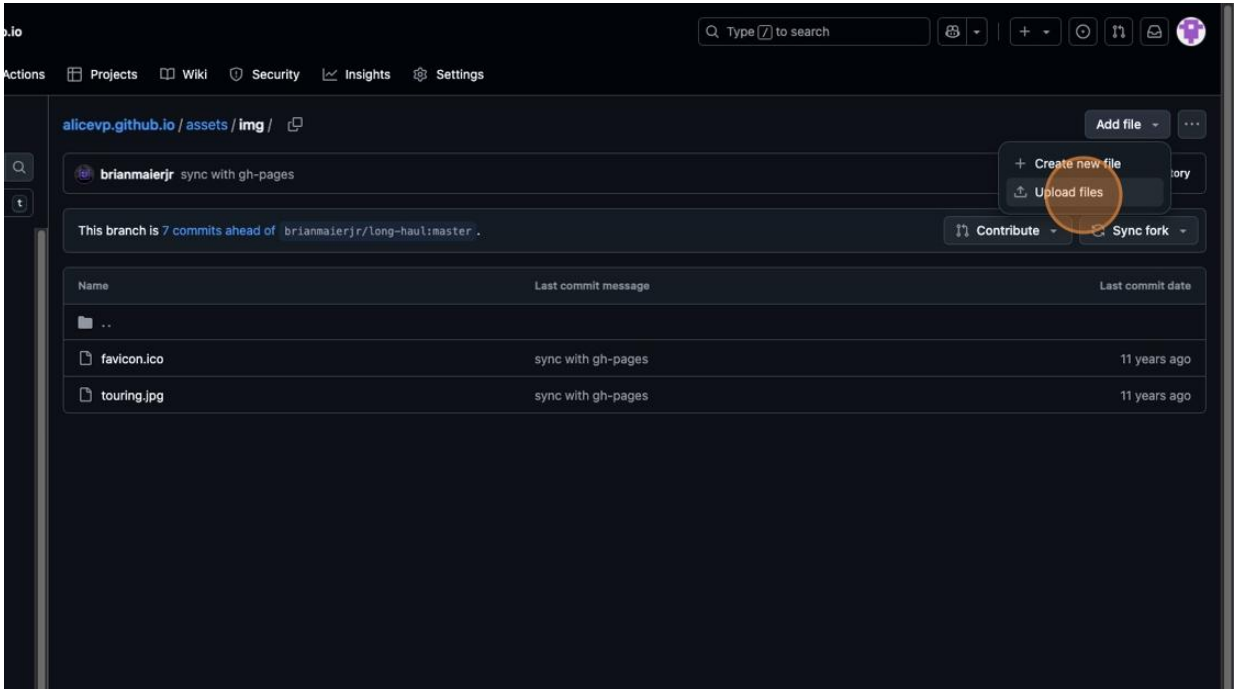

Upload an image

Step 8: Change Header Image

Upload an image

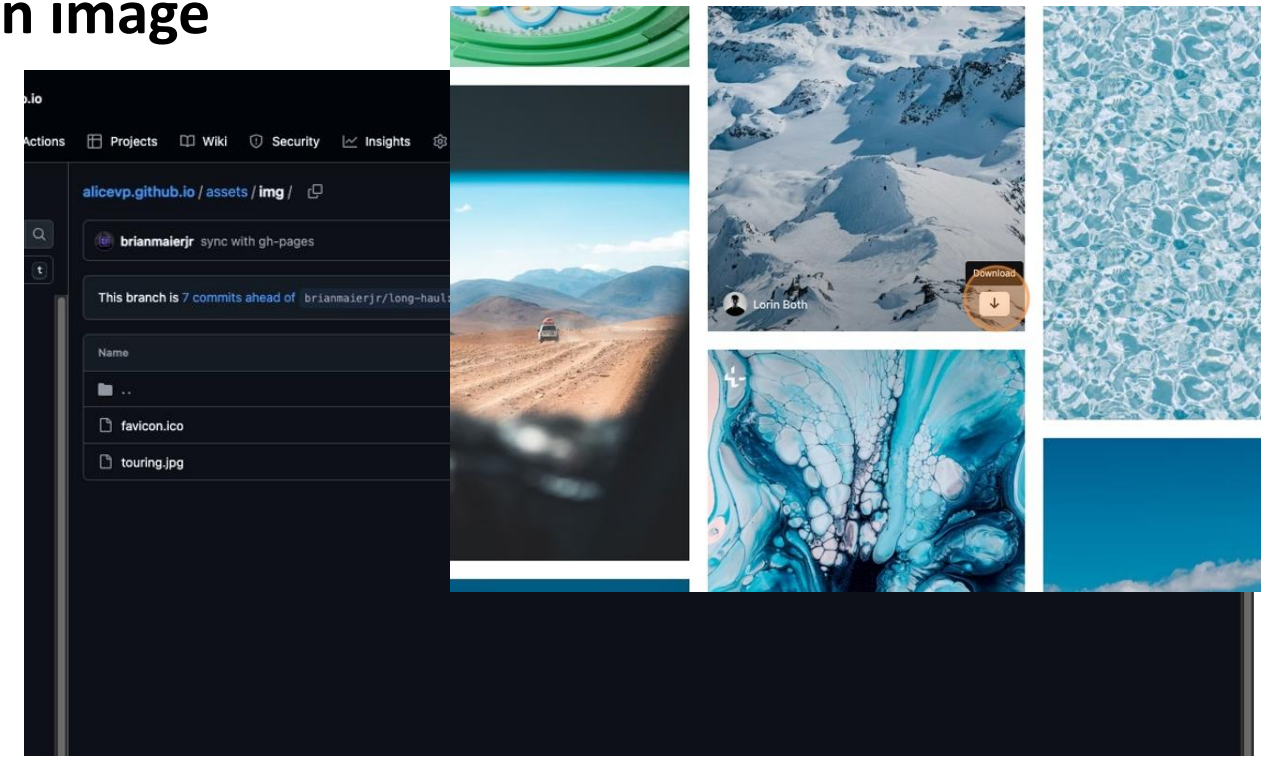

You can go to unsplash.com/images/stock & download an image

Step 8: Change Header Image

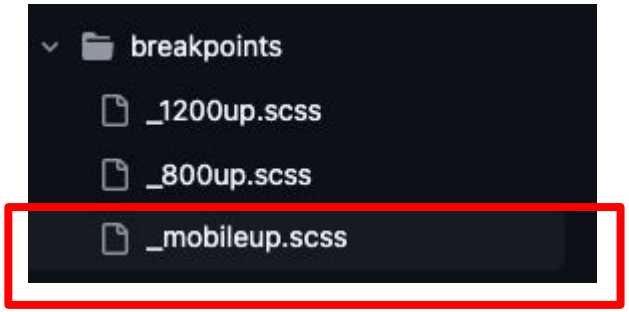

Upload an image

You can go to unsplash.com/images/stock & download an image

Step 8: Change Header Image

Navigate to *_sass/breakpoints/_mobileup.scss*

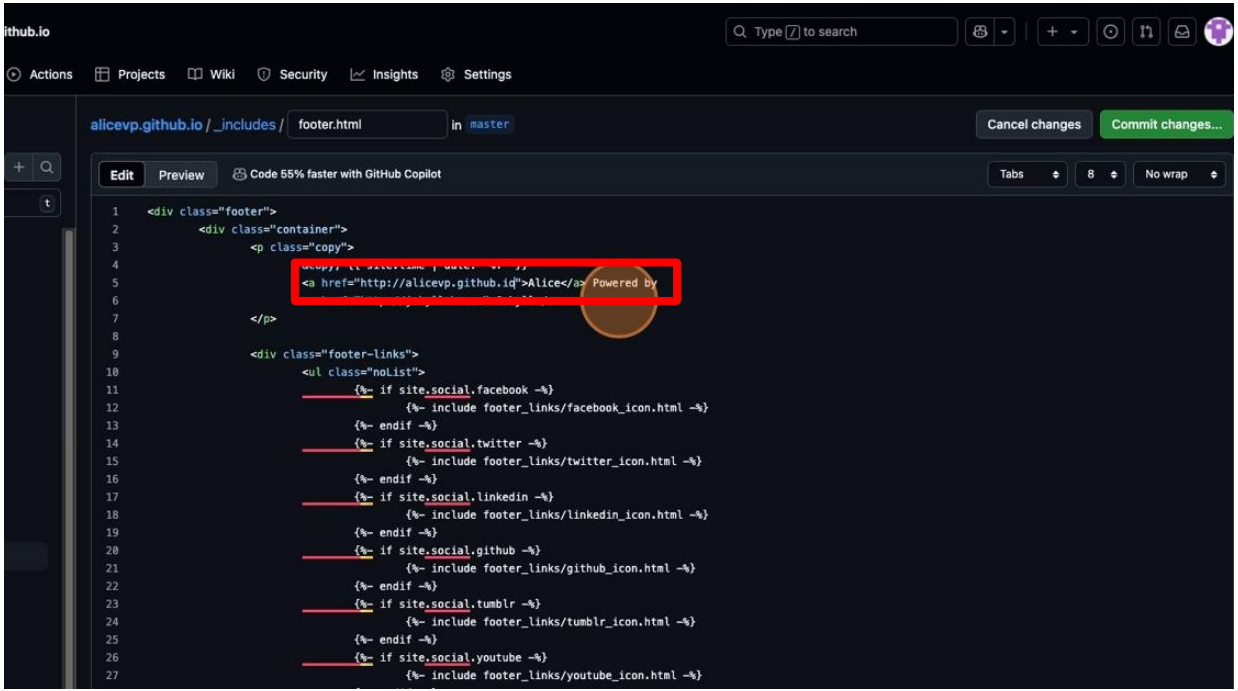

```
/****************
HEADER STYLING
****************/

.header {
        background-color: $background-color;
        background-image: url("../img/lorin-both--kU1Z5ugxWY-unsplash.jpg");
        background-size: cover;
        background-position: center center;
        color: white;
        padding: 0;
        height: 3em;

        .container {
                padding: 0;
                max-width: 100%;
        }
```

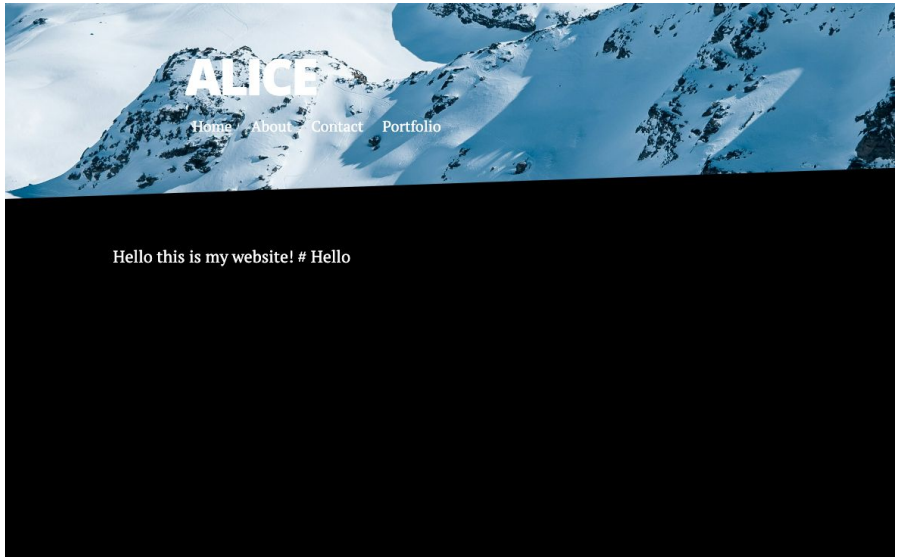

Step 8: Change Footer

Navigate to *_includes/footer.html*

Step 9: Fill out your website and have fun! :)

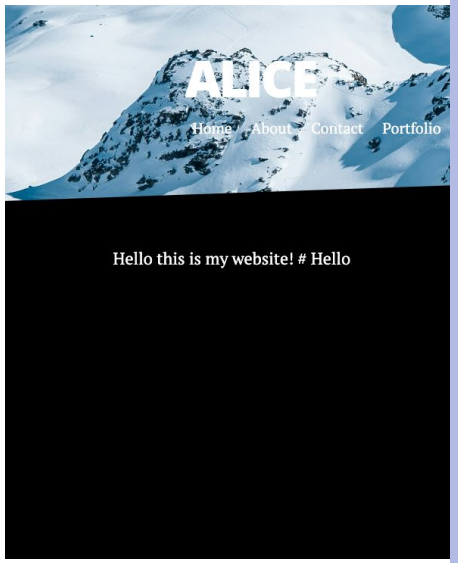

Congrats on your new website! 🥳
